1. The Single Most Critical Factor in Making Money Online

You may be wondering who am I and what qualify me to give you blogging advice. Well, my name is Meir Liraz. You may have stumbled on my name on the internet, probably in relation to my activities as a writer and publisher of business guides. This is just one side of me, the visible one. There has been another side to my online presence, a concealed one, as a leading player in the internet marketing arena.

I've been an active internet marketer since the first days of the Internet, back then the reigning search engines were dinosaurs bearing names like Alta-Vista, Infoseek and Lycos, while Google was just a vague idea in the minds of two brilliant Stanford University students.

As I don't believe in theories and opinions, I've tested dozens of Internet marketing ideas, strategies and variables. Some proved to be successful while others bombed (and served me well as learning experiences). I must've been doing something right as I managed to accumulate along the way a seven figure fortune. The bottom line is that I've come up with a simple strategy that has enabled me to make money online like crazy.

As a bonus, I've included within this book a special section where I describe exactly the simple strategy that made me an Internet Millionaire. This is a step by step guide that will allow you to mimic my method and make a killing online.

Why reveal my methods now? Well, I'm semi retired now and I've made enough money so that my kids do not have to work one more day in their lives (if they so desire). I've had my blessings and now I want to help others succeed as well, this is my way to give back.

Now look, 99% of the folks who try to make it on the Internet follow the same rout, the same set of activities. They all move in one big herd. Listen, In the highly competitive online arena, when you do the same things as anyone else you don't stand a chance to succeed - you are doomed.

In order to win the Internet marketing battles you must go off the beaten path, you need to do something different, you need a competitive edge - and that is where the simple strategy presented in the bonus section come into play. It will give you that "unfair advantage" to boost your sales, pile up profits and leave your competitors in the dust.

When a soldier goes into battle he seeks to equip himself with the best weapons he could lay his hands on. The same goes for the internet marketing battles. The single most important factor in utilizing this strategy successfully is equipping yourself with the right tools and services. The magic word is 'Automation'. You need to have the best tools and you need to know how to put them to best use. This is critical, some of the tools that I'll show you can actually hurt you if not used correctly.

Look, in order to make money on the internet you need to get noticed by Google and you need to climb up the search engines' results pages (SERPs). Unfortunately Google gives preference to large and established sites. The little guy with a relatively new or small website does not stand a chance. You could of course go the "natural" rout. That will take you about 5 years to establish a site that will be liked by Google. I don't know about you, but I prefer to start making money with a new site much earlier than that. That is why you need to use some special tools, to take some unconventional measures - you need to be a little more creative. Sound complicated? don't worry, in the special bonus section, I'll give you exact instructions as of how to do it right.

Here's a list of the tools and services that I use while executing my strategy, later on I'll show you exactly how the strategy works and how these tools integrates perfectly within it to come up with the easiest, fastest, most effective way of making money online:

- 1. Keyword Research Tool:** [Keyword Canine](http://www.liraz.com/canine) - a multi-featured tool for niche discovery, keyword research and backlink analysis (for more details see here: <http://www.liraz.com/canine>)
- 2. Hosting Service:** [HostGator](http://www.liraz.com/hostgator) - a reliable web hosting. Has some extra features that makes it suitable for internet marketing activities. (for more details see here: <http://www.liraz.com/hostgator>)
- 3. Wordpress Theme:** [Thesis](http://www.liraz.com/thesis) - much more than a theme, it's more of a design and template manager for Wordpress. Most suitable for a business site that is meant to be ranked high on the search engines. (for more details see here: <http://www.liraz.com/thesis>)
- 4. Content Creator:** [Article Builder](http://www.liraz.com/articlebuilder) - produces high quality unique articles built around the topics and keywords that you give it. (for more details see here: <http://www.liraz.com/articlebuilder>)
- 5. Email Marketing Tool:** [Weber](http://www.liraz.com/aweber) - automatically manage all email marketing activities: creates sign-up forms, collects and manages subscribers, sends out scheduled emails and more. Powerful yet very easy to use. (for more details see here: <http://www.liraz.com/aweber>)
- 6. Article Spinner:** [The Best spinner](http://www.liraz.com/bestspinner) - a multi-featured tool for creating multiple versions of an article that will be seen as unique in the search engines. (for more details see here: <http://www.liraz.com/bestspinner>)
- 7. Links Building knowledge:** [Link Building Course](http://www.liraz.com/linkbuilding) - a comprehensive link building learning framework that is constantly updated to reflect the most recent effective link building strategies (for more details see here: <http://www.liraz.com/linkbuilding>)
- 8. Manual Link Building:** [Rank Crew](http://www.liraz.com/rankcrew) - an affordable and reliable manual link building service (for more details see here: <http://www.liraz.com/rankcrew>).
- 9. Automatic Directory Submission:** [DeepLinkerPro](http://www.liraz.com/deeplinker) - automate the creation of manual directory links, allows the use of varied anchor text and also to drip feed the submissions over time to make it all look as natural as possible (for more details see here: <http://www.liraz.com/deeplinker>)
- 10. Automatic Link Builder:** [Senuke](http://www.liraz.com/senuke) - a powerful backlinking tool which has been designed to assist with the time consuming task of creating a large number of links (for more details see here: <http://www.liraz.com/senuke>)
- 11. Backlinks Indexer and Booster:** [Backlink Booster](http://www.liraz.com/backlinkbooster) - automatically increases the power of the backlinks to a website. It's both a backlink indexer aiming to get the backlinks indexed faster, and also a backlink booster to help boost the amount of link juice each of the backlinks sends to a website (for more details see here: <http://www.liraz.com/backlinkbooster>)

Now, the next chapter features great tips and ideas proven to kick-start your blogging. Starting in chapter 3 I reveal the simple strategy that made me an internet millionaire.

[Go to Top](#)

2. 101 Great Tips and Ideas Proven to Kick-Start Your Blogging

1. There is a lot of potential to build an online presence today, especially with the rising popularity of blogging. A lot of people today are getting into blogging and figuring out that they can use it to do things like making money or promoting their business. There are a lot of things blogging can accomplish, and if you want to see how best to do it then go through the tips in this chapter.
2. Make sure that you do not have duplicate content. You can check for this by using the robots that are out there. If you do have content that is duplicated, the search engines will probably tag your site for spam, and you will not wind up getting the attention that you are looking for.
3. Make sure that you are productive with your blog. Do not allow yourself to waste your time watching television, or playing games when you could be doing things to make your blog bring in more visitors. When you are using a blog to make money, you are going to have to put the work hours into it.
4. Making frequent and interesting comments on the blogs of other people is a great way to increase exposure to your own. Google Reader has an excellent tool for keeping tabs on blogs that are related to your own. Comment on these regularly, every time you wish to say something.
5. Title your posts to draw your reader's attention. No one is going to read a post with a poorly constructed and boring title. The title, after all, is what draws the reader's eye to the post. Without a distinctive title the page would just be a long, boring piece of assorted words.
6. Give your readers the opportunity to subscribe to your blog and your RSS feed. When people can have good content delivered hot and fresh, you increase your value to them ten fold. Keep the subscribe button in an easy to find place and deliver good content regularly to dissuade readers from discontinuing.
7. Blogging is a great way to promote a product or web site, if you encourage comments and discussion, that is. Blogs are informal and easy to set up, which means you can add as many posts as you want to describe your product and even ask your readers for valuable feedback. So, if you are selling a product in a brick and mortar store or on a web site, you should set up blog to take advantage of the marketing opportunities that it creates.
8. In order to successfully run a blog, you need ideas. To help you get these ideas you should visit forums other forums and blogs. Also, a lot of the time the people who

comment on your blog are great at generating new information that you might never have thought about before. To be relevant in today's blogging world, you need to constantly come up with fresh material that people want.

9. Make a mailing list. This can be essential to retaining and growing your audience. This is also a step that shouldn't be applied too early. You should wait until you start having a large number of regular readers. This can be essential if you are writing for a specific niche.

10. Use bold and italic formatting on the keywords you use in your blog. This is a practice that is not only helpful to search engine indexers; your readers will appreciate it, too. When your keywords are easy to read and they stand out, you will increase the possibility that your users will click on them. Remember that this should be your goal.

11. Before ever starting a blog, decide what you want from it. Would you like to gain recognition as an expert and create a reputation for yourself? Do you want to use your blog to make money? You may have different goals. You need to grasp your objectives, and proceed with your blog in a way that helps achieve them.

12. Keep track of what other bloggers are doing so that you can stay ahead of the game. It can only help to know what the blogging competition is up to. Other bloggers will also look at your blog to observe what you are doing.

13. You cannot spend enough time trying to find the right color for your blog. You need to find a color that reflects your niche and adds excitement to the topic. At the same time, you do not want a color that is difficult to look at for a long period of time.

14. On a particular day, or days, each week, provide a definition to a word relevant to the topic of your blog. Include some history or other important notes of interest. Be certain that you have properly researched the word before you post it, and make the presentation exciting for the reader.

15. Get yourself involved as an affiliate. Begin linking to other products that are relevant to your blog posts by making use of affiliate links. By doing this, you are giving your readers relevant links, which can possibly generate additional revenue for you. This is a win-win situation for both parties.

16. Make sure that you are using twitter to get your blog some attention. Be sure that you have a real presence on Twitter, and do not use this to replace any RSS feeds. Use Twitterfeed to put your new posts into Twitter. This will help you get more exposure.

17. Study your site's statistics to figure out what new aspects of your site are working. Try out different things to see what works best.

18. Try to create a cool and unique logo for your blogging venture and make sure that you include this logo on each and every blog that you post. This is an interesting way to add a unique flair to your blogs that your viewers will enjoy and appreciate in the long run.

19. If you are interested in blogging, but you don't particularly like to write, try starting a blog about one of your creative talents. You could try a photography blog and share your hobby with others. Or you may write poetry or music that you could post samples of. If people like what you have to offer, they will come back for more.

20. When running a blog, make sure that you ask open-ended questions. One of the most effective methods of getting people to respond to your posts is simply asking for it. Let your readers answer your questions by inviting them to respond with a comment. This makes them feel more engaged, which increases the odds that they'll stick with you.

21. Simplify your blog by avoiding inordinate amounts of multi-media. While pictures and the occasional video are definitely a nice touch, your words are more important than your ability to place obnoxious GIFs or pictures on your blog posts. Your readers will appreciate having balance in your posts and enjoying both written word and visual elements.

22. You need to post regularly if you want readers to visit your blog over and over. Posting new items frequently keeps your readers' interest so that they'll keep coming back. Some of the best blogs update at least once daily. If you think this may be difficult for you to achieve, put together advanced material that you can later add daily prior to the initial launch of your blog. This gives you plenty of useful content ahead of time, just in case you get stuck with it in the future.

23. An important part of any blog is to feature the latest posts at the top of your homepage. With so many blogs abandoned or out-of-date, it's important to let readers know that yours is current. This way, your readers will have fresh, new posts to read and you will get the best exposure for your newest content.

24. There are many good blogging platforms available with Blogger and WordPress being the most commonly used services. Both are great free platforms that allow one to quickly set up a blog for free. Blogger has the advantage of allowing commercial content whereas with WordPress you must upgrade to a premium service to post commercial content. Let your purpose for blogging be your guide when choosing a blogging platform.

25. Use pictures and other graphics to break up your text and draw in readers. Many people learn best in a graphic format rather than in a written format. By interspersing photographs, diagrams and other graphics into your blog, you are actually perfecting the overall image of the page. The entire page, in effect, becomes an image.

26. Make your blog appear reliable and informative by keeping yourself informed of new ideas and information at all times. You need to create a good reputation and that means it is imperative that you know what you are blogging about. By keeping current on news and educated on your topic, you will be forming a reputation people will know they can trust.

27. Make bullet points and include italic text along with keywords that are part of your niche. Doing this will help make your content easier for both search engines and your

readers to digest, and will give your traffic a boost. The proper use of keywords within highlighted text or lists should lead you to increased readership as more people are led to your writing by the search engines.

28. Try to make the most of your keywords. You should always try to stem your keywords into as many forms as possible. This means that you should include plural, singular, present and future forms of your keywords to ensure that when people search for the topic, they find your site.

29. One way to engage your blog readers is to add a poll to your blog. This feature is commonly available on most blogging platforms and allows you to ask for input from your readers. You could ask what they want to see more of or less of and use the poll results to fine-tune your blog. So, add a poll and get to know your audience better.

30. Use social media sites to promote your blog. Many people will link blogs that they like on their social media page, and you can do the same thing. This will draw more attention to your blog, and more likely your friends will check your blog out, and may post it to their social media site as well.

31. When you are creating your blog, consider purchasing your own domain name, rather than using a free site. It isn't that expensive to do, and will give your blog a more professional appearance. That will also be simpler for people to keep in mind; this is especially true if you use relevant wording for your title, or use your company's name.

32. If possible, have someone else go over your blog posts before you post them. This is especially critical for internet marketing posts. People have a tendency to be blind to their own errors, so they will often miss problems with grammar, spelling, sequence, or logic. Another person may also be able to provide information you have left out or correct errors of fact.

33. Ask a blog that is popular in your niche to post a link on their blog. It may take a few days for them to get back to you, but you should not get discouraged. It's important the blog you want your link posted on is relevant to your niche.

34. When you decide to begin a blog, be certain that the topic is something that you find engaging and that ignites your desire to share with others. Writing the content of your blog will take several hours each week. You want to be certain that you have a passion for the subject.

35. There are several ways to highlight interesting content on your blog. You can show a list of upcoming posts to pique readers' interest. Another good topic is a list of most popular posts. These are posts that many readers will be interested in. You can also try most commented posts. Many people enjoy reading comments to blog posts. All these ideas will get your readers interested in more than just your current posts.

36. When you are managing your own blog, it is absolutely necessary that you properly edit and proofread each post you write. Nothing looks worse than misspelled words, awkward wording, or grammatical mistakes when you are trying to make your blog look

professional. Be sure to use spell-check or even have someone proofread for you. Your reputation depends on it!

37. Majority of the traffic that your site will receive is going to come from search engines such as Yahoo, Google or Bing. Knowing how to use SEO tools is going to help you to have a higher ranked webpage which will bring in more viewers. You will know how to use the correct keywords and where to place them for the most success.

38. Try to utilize synonyms for your keywords. This will ensure that your site does not come off as a piece of spam. Varying your word choice is also a great way to catch the attention of your varied audience. This is an easy step that can make a world of difference for your blog.

39. Avoid a blog that is too general in scope! Don't make your blog about anything and everything or you will find no audience exists for such a thing. Instead, focus in on a subject you know well or have a great interest in. By doing so, you will stay interested in blogging and connect with readers with similar interests. So, pick a topic and stick to it and you will build a following.

40. Try to include at least one picture in your blog posts. Images can sometimes express an idea better than words. They improve the overall reading experience. Choose compelling pictures related to your posts that readers will be likely to remember. Using pictures creatively will increase the chances that a reader will revisit your blog, and share your posts with others.

41. Go to blogging conventions if you have the financial means to make this happen. These conferences are usually designed for specific interest groups or businesses, so you can come away from them with some beneficial and constructive information that will help you become a better blogger. They are also a great place to network with other successful bloggers. Who knows, some of their success may rub off on you.

42. Design is vitally important for a blog. It is important that your blog is easily readable. You need to have the right colors for your background and text to ensure that your readers can see all of the text in a clear and candid manner. This will ensure that you keep your readers happy.

43. Stay accessible to your readers. Try to make this a habit for both you and your readers. If you can connect with readers, they feel that they can contact you. If you want to give up on blogging, keep in mind that you're not the only one who will be disappointed.

44. Set goals for your blog. Having set goals that you want to achieve will go along way towards increasing your productivity. Decide how many posts you want to make in a given week. Determine what your focus is going to be and what keywords you are going to be targeting. Taking the time to work out your goals, will keep you on focus and blogging productively.

45. Keep your individual post focused on one point. Blog with the full knowledge that you will be making many subsequent posts and if you tell everything in the beginning

you may not have anything left to say later! Think of your blogs as being the spokes in a wheel. By themselves they are important but as a wheel they are incredibly important.

46. If you are going to blog, you need to make sure you choose a niche or market that you are passionate about. There are plenty of blogs out there, and there are just as many topics to choose from. Stay specific, and choose a blogging subject that you can create a successful blog with.

47. Pay attention to your grammar. This is especially important if you are trying to be an International blogger. If your grammar is not up to par, a lot of people will get annoyed with reading your blog, and think that you are not creditable. There are many programs that you can use to run a grammar check, and you should do this with every entry.

48. Avoid the overuse of personal pronouns. When most of your blog is coming from an I, me or you standpoint, it can turn the reader off. You may be perceived as lecturing, pompous or just plain narcissistic. Make your writing a little less personal, but still remain approachable. It is a good balance to find.

49. Make alternative content. Your blog may have much more than just text. Try using multimedia. You can use video content, make podcasts, or just use alternative creative application on your posts, like PDF booklets, mind maps, or templates. Even something like a simple download page for your blog can make for many more visits to your blog.

50. One key aspect of blogging is to enjoy yourself while doing it. If you are bored, your content is probably boring to your audience; being disconnected and uninterested in your content shows through in your writing. Write on a topic you love, and enjoy what you create. If you enjoy the topic that you are writing about, that enjoyment will become contagious!

51. Include an easy to follow index on your blog page. If you do not have an index, the people who view your site may have a difficult time trying to navigate across your site. An index will make your site more user-friendly, which will bring your readers back for more.

52. Know what your competition is doing with their blogs, and make sure you are doing all that and more. Since they are competing against you, it is good to know their actions. Remember that they are probably on your blog for similar reasons.

53. Use fonts that are easy to read throughout the blog. While you may wish to use different fonts for the title, posts, and links on your site, all should be readable. Ensure that the size is not too small, and that the contrast to the background is sufficient to differentiate between it and the text.

54. If you have a talent with graphics, create a regular cartoon that depicts something related to your content. No matter what you blog about, people enjoy laughing and looking at the lighter side of things. If you don't have the skills, perhaps you have someone in your social circle who would work with you.

55. Try posting in advance. Do not be shy, or think that it can ruin the authenticity of your blog. As long as you remain the author that writes timeless content, there won't be any problems. Posting in advance can be a good strategy to use, and it can relieve your stress by already covering something ahead of time.

56. Try breaking your posts into manageable pieces. This is a very easy, but unfortunately ignored blogging tactic. Do not write like you are trying to run a marathon. Break up your posts in smaller pieces. This can help boost your SEO, and it can help create a clearer writing approach. This can actually help you think better.

57. Make sure that you are blogging for the right reasons. If you are looking for some quick money, this is not the way to go. Blogging should be more of a hobby. If it becomes something that you start to dread, your writing will not be very good, and you will have less readers.

58. Patience is one of the most important parts of growing your list of readers. It takes a while, even years, to build to great success as people find your blog. You also have to build up the amount of content on your blog before there is enough to entice a large audience to visit. As your blog becomes more established and you build up a sizable amount of content, more people will come to visit it.

59. Guest blogging can be your best friend when it comes to leading readers to your own blog. Find a good, relevant blog whose owner will allow you to post. Then create some awesomely written posts and make them stand out among other guest posts. Use this tool to give readers a taste of what they can find by hopping over to your blog!

60. Make your blog a primary source of information on the topic. With a simple read through your site, your viewer should feel like they have a thorough understanding of your niche. This will ensure that your readers will come back to your site when they have more questions on the topic.

61. Redistribute your blog posts all over the worldwide web. This way, you can be sure they will be seen by a wide variety of readers. Remember that you must not limit the outlets that you have for success. You will have the greatest success if you use one fell swoop to gain as many viewers as possible. Use every outlet available to garner attention.

62. You may want to have contests or giveaways on your site. This helps readers to become a part of your blog and increases their excitement about visiting. Readers are also likely to send links to contacts interested in the content of your contest. The giveaway can vary, depending on your site.

63. Take time to read over your blog. This step tends to be ignored quite often. You have to be the first reader. Whenever you have some free time, try reading some of your older posts. It can really help you see what you can do to improve with your posts in the future.

64. Create a handful of blog posts that you keep in a special file for emergency use. Use them when you are ill, or have some other situation that prevents you from having

the time or energy to write quality content. Doing so will provide your readers with regularity, while allowing you time to deal with your situation.

65. Make a mailing list. This can be essential to retaining and growing your audience. This is also a step that shouldn't be applied too early. You should wait until you start having a large number of regular readers. This can be essential if you are writing for a specific niche.

66. Your blog should have a contact page that is easy to find. This will permit visitors to post questions, or provide you with suggestions. Your blog may be read by a wide variety of people, and allowing them to get in touch may provide valuable feedback, including that from perspectives you hadn't considered.

67. An excellent tip for blogging is to make use of WordPress. This particular platform is extremely flexible with the various plug-ins that are used when it comes to blogging. WordPress is being utilized by over 12% of a million of the largest websites. It is currently the most popular CMS being used today.

68. Use the correct spam filter for comments. If you require registration to comment, a CAPTCHA on the registration page is usually sufficient to keep spammers away. If you allow anonymous comments, an "advanced CAPTCHA," that is, one that asks the user for "the number of hours in a day" or something similar is usually enough. Avoid services like Akismet, as these produce lots of false positives.

69. Be as accessible to your readers as possible. Connections are important in the online world, and this is especially true when you are writing a blog. Consistent communication with your readers can help establish a strong connection between you and your readers that results from the exchange of ideas with one another. If you want to give up on blogging, keep in mind that you're not the only one who will be disappointed.

70. Try finding your size yourself. Figure out a post size that will fit with your skills and habits. Don't copy other bloggers, try finding what works for you by experimenting. Some 600-700 words per entry, and some write 2000-3000 words per entry. Try testing what works for your own writing style and needs.

71. Create an email update list for your blog. On your site, offer a place for people to sign up for these updates and send them out every time you post a new blog. Those who are truly interested in following your blog will like the idea of being notified when new content is posted.

72. Ask some popular bloggers to guest post on your blog. This is a simple way to add more high-quality content to your site. Additionally, you should receive more traffic when they alert their regular readers of the guest appearance. Use several bloggers to do this and create more rich content.

73. Providing an RSS-to-Email option is a great tip for those running a blog. This can be used so that readers have the ability to subscribe to all your latest posts without needing

an RSS reader. Even today, lots of people do not use RSS, so using a RSS-to-Email service is crucial. An excellent choice for one is Feedburner.

74. You can use other forms of social media to promote your blog, but be careful not to overdo it. If all your tweets are only a link to your blog, then they will be ignored. Intersperse links with interesting, 'stand alone' content.

75. Joining blogging networks can be a highly effective method for promoting and advertising your blog. Blogging networks help provide targeted readers. Getting targeted readers and increasing your readership, are two main objectives when starting a blog. Blogging networks also help network you with other bloggers, which creates a web of informative blogs for certain niches.

76. Try using features or excerpts on the homepage of your blog. If you made a different home page for the blog, you are not required to only list posts. Try using a single or double full posts on the page. This can help your reader remained focused. This can also help with clutter on your blog.

77. Try to give your posts a more positive note, rather than dwelling on negative aspects in your posts. This will ensure that you get the most readership. People do not naturally want to come to a site to read about the negative things. They want to read about positive aspects instead.

78. Divide your blog into categories and subcategories so viewers can easily find your content. Not only will this make it easier for your viewers to locate information, but after you have accumulated enough content, you will have a much easier time keeping it sorted in your own inventory as well.

79. Make sure your posts don't elicit the "It's too long so I didn't read it" response from your readers. Studies show that people stop paying attention more quickly when reading on the web than they do when reading print. For this reason, try to keep posts under 300 words or so. Some types of posts, such as scholarly articles, don't suffer from this loss of attention of much as others, so know your audience.

80. Think of your blog posts as travelers. When you have clicked the publish button, the blog post will continue to survive on its own. Your blog post then becomes a traveler. Try giving your posts what they need to deal with any harsh conditions, along with good instructions on how to prosper online.

81. Don't make your blog look too crowded or your readers will go elsewhere. If you jumble everything together, trying to get the most material you can get on one page, readers will become overwhelmed. Carefully determine what is important to include on a page, and what is better reserved for the next page.

82. Research who your readers are before you ever start writing. People that share an interest in a particular subject usually have a number of other characteristics in common as well. You can use that fact to your advantage to accomplish your goals. Your goal may be to inform, it may be to sell a product. To do either, you need to know your readers.

83. Take advantage of the many tools that have been specially created for bloggers. In the last year or two the market has exploded with software that is designed to make the blogger's job easier. If this software is used correctly, not only will your blog benefit, your job will become considerably easier to handle.

84. Don't become entrapped with "right now". hot topic writing can only last as long as the hot topics do. Many times, that is a very short time period. Try writing content that can be easily read months and years down the road. Even if the content is about a hot topic, Try including something timeless in it.

85. Having active commentary on your blog is an effective way to maintain traffic. This is because comments are content just like blog articles. Readers will revisit your blog not only to read new articles, but also to see if anyone has left new comments. You can encourage commenting by asking questions and inquiring about your readers' perspectives in your blog articles. Responding to comments also encourages commenting.

86. Always do your homework and research any topic you will cover on your blog. If you've got a lot of knowledge on a topic, you're less likely to make a misleading or inaccurate post. Knowing as much as you can will also allow you to respond to comments quickly and accurately.

87. Free stuff attracts people and always has. Offer freebies on your blog. People always enjoy getting something for nothing, even if that something is small. The more contests and freebies you have, the bigger the payoff for you, in terms of readers and followers. In addition, they are likely to return to see what other free things you have to offer in the future.

88. Be sure to identify the hotspots of your blog. Hotspots are the places that tend to be the most visible on your blog. What you have in these areas depends on your layout and your reader's reading habits. You could use the space for various incentives, such as reminders for subscribing, advertising, or even premium content.

89. Do not copy other people's articles. Plagiarism is taken seriously, and if you do plagiarize you are ruining your reputation. Finding success in a blog does not require you to write like a professional. The important thing you need to have is passion about the things that you are writing.

90. Your blog goes much further than just your posts. It may look like just a collection of various articles, but it's so much more. To be a successful blogger, your blog needs a presence. This is created by your posts and comments, both on your blog and other online sites.

91. Keyword Research: When blogging, you have to know what people are searching for in a particular niche. What keywords are they typing in? With these things in mind, perform keyword research and put the relevant keywords in your blog. This will make your site highly visible in the search engines for the top performing keywords, and this results in you getting a big boost in traffic.

92. Link building is a great way to traffic to your blog. In order to generate enough quality links you need to submit your blog to web directories like DMOZ, Aviva and other blog directories. Doing this creates incoming links which help your site get spidered, indexed and ranked higher by search engines, all of which drives more traffic to your blog.

93. Make sure that you have SEO friendly themes, plug-ins and templates. This will allow your blog to load very quickly. The faster something loads, the more people are going to be willing to look at it. If a page takes too long to load, more than likely a visitor will just close the page.

94. Remember that you have a life outside of blogging. If you don't take a break, you run the risk of burning out. Take a short walk, call a friend or take a quick break for a few minutes. Taking some time off will let you return to your blog refreshed and ready to write.

95. Give your readers every possible way to follow and share your blog. LinkedIn, Twitter, Facebook and other social networking sites can be very helpful in getting your blog recognized and having it become successful. This will allow your readers to forward your content to their peers and bring in more traffic.

96. As you write your blogs, you should try to utilize references and sources that matter. References will give your blog a greater inter-connectivity throughout the world wide web which will instantly help you get more attention for your site. This is a simple step that you can take to make your blog that much better.

97. Try to use a greeting just before your content. Prior to your content, use a sentence that welcomes your users,. This is completely based upon their referrer. It also gives them particular incentives. There are some handy ones out there that you can find, you can write your own, or search for a plugin.

98. An easy way to come up with new blog content when you are having writer's block is to look back through old posts. Many posts that are old or outdated can be brought back to life with fresh, up-to-date information. Or you may find a piece of an older post that you can expand into a full post. Check your archives! You never know what you'll find!

99. Use empty space to improve visual interest in your page. There is a reason why those who produce hard copy material abide by certain formatting rules. Margins, spacing between lines and blocks of text, and even spacing between sentences is important to the overall visual effect of your blog.

100. Consider making posts that contain fun lists, like a "top ten," or whatever number you desire. You can do this on a regular basis, enticing your readers to see what interesting list you conceive next. You can use bullets or numbers, with links to greater content included in each one.

101. Blogging is a great way to promote a product or web site, if you encourage comments and discussion, that is. Blogs are informal and easy to set up, which means you can add as many posts as you want to describe your product and even ask your

readers for valuable feedback. So, if you are selling a product in a brick and mortar store or on a web site, you should set up blog to take advantage of the marketing opportunities that it creates.

Special Bonus: The Simple Strategy That Made Me an Internet Millionaire

3. The First Step: Discovering Profit-Driving Keywords

There is a special breed of Online-Millionaires that are making money on the internet like crazy. You've probably never heard of them. They keep themselves and their activities under the radar. Why? because they follow a certain simple strategy and they don't want you or anyone else to discover it. This strategy has created more millionaires than you could ever think possible.

How do I know? I am one of those Millionaires, and I'm going to reveal to you now each and every component of this incredible strategy.

My name is Meir Liraz. You may have stumbled on my name on the internet, probably in relation to my capacity as a writer and publisher of business guides. This is just one side of me, the visible one. There has been another side to my online presence, a concealed one. And there is where I've been taking advantage of that simple strategy to accumulate my seven figure fortune.

So why reveal my methods now? Well, I'm semi retired and I've made enough money so that my kids do not need to work one more day in their lives (if they so desire). I've had my blessings and now I want to help others succeed as well, this is my way to give back.

Now look, 99% of the folks who try to make it on the Internet follow the same rout, the same set of activities. They all move in one big herd. Listen, In the highly competitive online arena, when you do the same things as anyone else you don't stand a chance to succeed - you are doomed.

In order to win the internet battles you must go off the beaten path, you need to do something different, you need a competitive edge - and that is where my simple strategy comes into play. It gives you that "unfair advantage" to boost your sales, pile up profits and leave your competitors in the dust.

When a soldier goes into battle he seeks to equip himself with the best weapons he could lay his hands on. The same goes for the internet battles. The single most important factor in utilizing my strategy successfully is equipping yourself with the right tools and services. The magic word is 'Automation'. You need to have the best tools and you need to know how to put them to best use. This is critical, some of the tools that I'll show you can actually hurt you if not used correctly.

Look, in order to make money on the internet you need to get noticed by the search engines and you need to climb up the search engines result pages (SERPs). Unfortunately Google and the other search engines give preference to large and established sites. The little guy with a relatively new or small website does not stand a chance. You could of course go the "natural" rout. That will take you about 5 years to establish a site that will be liked by Google. I don't know about you, but I prefer to start

making money with a new site much earlier than that. That is why you need to use some special tools, to take some unconventional measures - you need to be a little more creative.

As a matter of fact, one of the best kept secrets of the cyber-millionaires is what tools they use and, more importantly, how they make use of them for maximum benefit.

Now I'm going to show you exactly how this simple strategy works and how the tools integrate perfectly within it to come up with the easiest, fastest, most effective way of making money online.

The way my strategy works is simple. You focus on creating quick little sites that each target a laser targeted long-tail keywords. Once you complete one site you quickly move onto the next. So you don't want to spend too much time on any one site. This way you create, one by one, an army of passive income websites that keep producing cash for years.

I'll show you exactly how to create and promote your first money making website, than you just rinse and repeat to create as many websites as you wish, the more sites you create the more money you make. The only limit is how far you want to go.

Now let's not waste any more time and move directly to the first component of the strategy which deals with deciding on the keywords your site is going to target. This is a crucial decision and a fundamental part of achieving success online. You could do everything else perfectly, but target the wrong keywords and your site will be a total failure. in this chapter I'll tell you exactly what to look for when searching for good solid keywords.

Most Internet Marketing "experts" and the self-proclaimed gurus will tell you to use the Google Keyword Tool (now called: "Keyword Planner" and is only available to Adwords account users) for your keyword research. This is a big mistake! if you only use the Google tool you'll end up going in circles with the rest of the herd achieving no success. Why? although the Google tool will provide you with a nice list of several hundred keyword variations, it will tell you nothing as to the competitiveness of the terms. You have no clue as to how hard it will be to rank in the search engines for any specific term. This is critical. Most newbies will choose a term from the Google Tool that is too competitive and end up hitting a brick wall. You certainly don't want to be spending any time or money building a site that will never rank in the SE's.

In order to implement the strategy successfully you need to utilize for your keyword research a tool named [Keyword Canine](http://www.liraz.com/canine) (If the link doesn't work, copy and paste the following URL into a browser: **www.liraz.com/canine**).

Keyword Canine (KC) will also provide you with a nice list of several hundred keyword variations but it goes beyond the Google Tool in that it will also analyze the competitiveness of each keyword variation. This is crucial and that is where you gain your "unfair advantage" over the 99% that only use the Google Tool.

How does KC do it? it has a special algorithm in its backend that looks at the top 10 Google search results for your chosen keyword and produces an accurate analysis in the form of "Very Easy, Easy, Moderate, Hard or Fierce" so you can literally plug in your keyword and get an instant answer.

Keyword Canine has a ton of additional features that can help you as an Internet marketer but for the purpose the implementation of my strategy, the competition analysis is what we need.

I'm not going to walk you here thru the steps of conducting a keyword research with Keyword Canine as they have pretty good tutorials explaining everything. Simply sign for the service and follow their instructions.

Now let's see what properties a keyword must have in order to make us the most money.

For starter it has to be of a commercial value. This relates to our business model, the way we monetize our site. I will elaborate on this in a later chapter but for now I can tell you that our income will come from two sources:

- a. Google AdSense ads.
- b. Affiliate Programs

To maximize our income from those two we need to look for keywords in markets that has AdSense advertisers and affiliate programs that are willing to pay us top dollars. in the appendix you can find a list of the 50 best paying affiliate marketing niches. These are the markets that has a high concentration of AdSense advertisers and affiliate programs that are willing to pay top Dollars for your referrals. If you plan to tap any of these niches you must take into consideration that these are also the most competitive ones. However, I think it is still possible to find gem keywords in these areas provided you do your keyword research right. Alternatively you can look at other, less competitive, niches and still make good money as long as you take into consideration their commercial value.

Another property that you want to consider when looking for good keywords is the search volume. Obviously, even a #1 ranking isn't going to do you any good at all if nobody searches for the keyword that you rank for. I would say that the minimum search volume you should look for is 500 monthly searches (Keyword Canine shows you the search volume right next to the keywords in the list). Some will say that this is too low to target, however I had many successes with pages targeting close to this number of monthly searches.

The next property you need to consider for a good keyword is how competitive it is, how hard it will be to have it ranked in the first page of Google's search results. This is critical, however if you use Keyword Canine it will do the competition analysis for you and come with a recommendation in the form of "Very Easy, Easy, Moderate, Hard or Fierce". I would not go beyond "easy" with a new site.

So to summarize, in order to find a good keyword you need to consider:

- * Commercial value
- * Search volume
- * competition strength

How many keywords should you target in one site? Some will tell you that you need to look for several terms and optimize each page in the site for a different term. This is not how my strategy works. For the small niche sites that we create it is best to dedicate each site to only one keyword and direct all our Search Engine Optimization (SEO) efforts towards the main page that is optimized for that keyword. We don't want to dilute our efforts by targeting several keywords in a site. With this concept in mind we don't want to waste our time looking for other keywords that will not rank anyway. Your time is better spent working on your linking structure (discussed later) or researching new keywords for new sites.

[Go to Top](#)

4. The Second Step: Monetizing Your Site

The Simple Strategy's business model is based on 2 sources of income:

- a. Google AdSense ads.
- b. Affiliate Programs

Which is better? there is no clear answer to this question. Some niches will produce better with affiliate programs while others with AdSense, you should test on a niche by niche bases. Usually you'll make more money with an affiliate site, unfortunately there may be many instances where you will find a good niche with keywords that can be easily ranked but no suitable affiliate program, in this case you'll use AdSense ads, and by the way, this will happen to you a lot.

Once you find a good keyword to target you start looking for an affiliate program that will go with this site. As a rule of thumb you should always prefer to promote digital products (eBooks, software, online services, etc.) over physical products. Why? because digital products come with higher margins which in most cases translate into higher commissions to the site owner.

Where can you find good affiliate programs to promote?

Your first bet should be the [Clickbank Marketplace](https://accounts.clickbank.com/marketplace.htm) (<https://accounts.clickbank.com/marketplace.htm>)

Clickbank offers thousands of products, look for products that are 100% relevant to your niche and has a credible sales page.

If you can't find a suitable product at Clickbank try one of the following affiliate program directories:

[Commission Junction](http://www.cj.com) (<http://www.cj.com>)

[Affiliatetips.com](http://www.affiliatetips.com) (<http://www.affiliatetips.com>)

[AssociatePrograms.com](http://www.associateprograms.com/directory/) (<http://www.associateprograms.com/directory/>)

[Affiliatesdirectory.com](http://affiliatesdirectory.com/directory) (<http://affiliatesdirectory.com/directory>)

If you still can't find a suitable affiliate program try a Google search that combines your keyword with the word "affiliates" and other similar variations. Sometimes this works and you will find one or more good affiliate offers for your niche.

If all of the above does not work and you can't find an affiliate program that is relevant to your target niche, monetize your site with AdSense ads. This is not necessarily a bad thing. I had AdSense ads that produced \$5, \$6 and even \$9 per click.

Anyway, don't ever be tempted to post affiliate links that are not fully relevant to your target keywords! this will never produce satisfactory results.

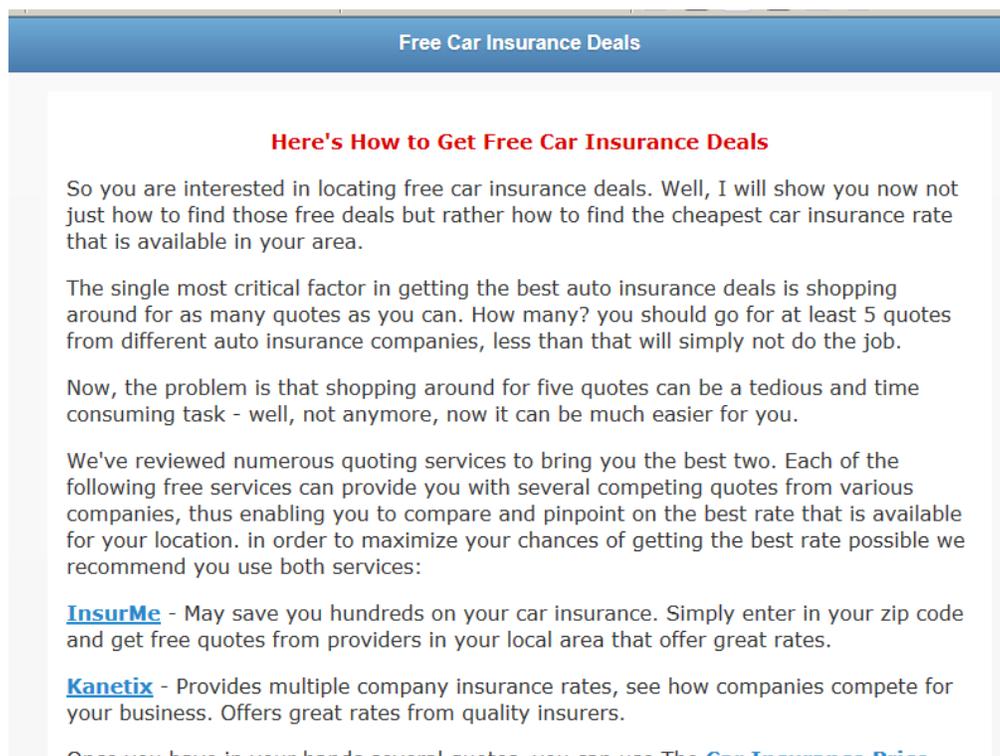

Where should you place your affiliate links and AdSense ads on the page? The best spot would be right below the top article title and above the article body, if you are using Wordpress it would be directly below the post title and above the post content. This would be the spot that will by far produce the best results.

As for the AdSense ads, I always match the background and border of the ad with the background of the theme where the ad will be placed and I recommend you do the same - my tests show that this increases the effectiveness of the ads. You can use a plug-in for Firefox and Chrome called [Colorzilla](http://www.colorzilla.com/) (http://www.colorzilla.com/) to help you do this quickly.

Another good option for the affiliate links is to embed them within the text, preferably towards the top part of the article.

As for affiliate links, my tests show that reviews and text ads will, in most cases, outperform banners. I guess some folks simply ignore banners altogether. I seldom use banners to promote affiliate offers, I've always found effective ways to present affiliate offers with text only. I will be the first to admit that my pages are not very pretty, but hey, I'm not in the business of creating cute pages, I am in the business of making money, and for this my "not pretty" pages are doing very well.

Below is an example of affiliate links embedded within an article:

The screenshot shows a blue header with the text "Free Car Insurance Deals". Below the header is a white box containing the following text:

Here's How to Get Free Car Insurance Deals

So you are interested in locating free car insurance deals. Well, I will show you now not just how to find those free deals but rather how to find the cheapest car insurance rate that is available in your area.

The single most critical factor in getting the best auto insurance deals is shopping around for as many quotes as you can. How many? you should go for at least 5 quotes from different auto insurance companies, less than that will simply not do the job.

Now, the problem is that shopping around for five quotes can be a tedious and time consuming task - well, not anymore, now it can be much easier for you.

We've reviewed numerous quoting services to bring you the best two. Each of the following free services can provide you with several competing quotes from various companies, thus enabling you to compare and pinpoint on the best rate that is available for your location. in order to maximize your chances of getting the best rate possible we recommend you use both services:

[InsurMe](#) - May save you hundreds on your car insurance. Simply enter in your zip code and get free quotes from providers in your local area that offer great rates.

[Kanetix](#) - Provides multiple company insurance rates, see how companies compete for your business. Offers great rates from quality insurers.

Once you have in your hands several quotes, you can use [The Car Insurance Price](#)

Here's is an example of affiliate links in a review format placed under the title of an article. By the way, I've used this format, "The 5 Best ...", multiple times with various niches. Over the years this format proved to be very profitable for me.

Car Insurance Information Center

7 Day Car Insurance, Compare to Get Low Cost Rate

The 5 Best Car Insurance Quotes Providers

We've reviewed dozens of auto insurance companies, brokers and agents to bring you this elite list of brands with the best free quotes online and very cheap rates. We recommend you get a quote from each company so that you will be able to compare and get the best rate. This comparison will allow you to save as much as \$500 and more on your vehicle insurance.

- | | |
|---|---|
| 1 | Car Insurance Finders - May save you hundreds on your car insurance. Simply enter in your zip code and get free quotes from providers in your local area that offer the best rates. |
| 2 | USInsurance - Simply fill out the quick form and this system will match you up with the cheapest offers in real-time. You get low cost custom tailored quotes within minutes. |
| 3 | InsureMe - Provides multiple company insurance rates, see how companies compete for your business. Offers great rates from quality insurers. |
| 4 | 2Insure4Less - Provides comparison quotes which can be purchased immediately, offers great rates. |
| 5 | Kanetix - Offers one of the easiest to use, and most 'consumer-friendly' instant insurance comparison service available. |

For many people, it is not easy to get a large amount to cover something such as insurance coverage. It could be a significant wide range of dollars to cover at one time, therefore, the choice of no deposit car insurance is often rather appealing.

No deposit car insurance implies that you get instant auto insurance protection straight away, when the insurance policy is put over your car, so you do not need to pay anything in advance. You are able to pay the insurance policy on a monthly base in payments; nevertheless, you may have to offer a credit card for guarantee that you submit several

Build an Email List

The biggest sin committed by internet marketers is not building an email list made of emails collected from visitors and customers. In order to maximize the profit potential of your site you need to create an email list. Fortunately, all the aspects of building and maintaining a list can be, and should be, automated. Selling to your list is the easiest money you're going to make.

Now I'm not going to teach you basic Email marketing here, you'll find plenty of resources online. However, here are 4 important points that you should consider:

1. Build an opt-in form and integrate it into your home page. Place it "above the fold," so visitors can see it immediately and don't have to scroll down.
2. Offer a lead magnet, something that has value that you offer in exchange for the visitor's email address. This could be a free eBook, a special report, a webinar, a list of tips, Etc. You have to tailor the offer to fit your niche so that you keep your list targeted, this is important.

3. Use [Weber](#) (If the link doesn't work, copy and paste the following URL into a browser: **www.liraz.com/aweber**) to manage your list building and marketing activities. Aweber is the industry standard. It's extremely powerful yet very easy to use, most of the successful internet marketers use it. Working with Aweber is a breath, it will automate all your email marketing activities: creating your sign-up forms, collecting and managing subscribers, sending out scheduled emails and more.

4. Email marketing is about creating a relation with your visitors and customers, it's about trust. Do not abuse it by spamming your list with frequent blatant sales offers. Send them at list 3 useful, content filled, emails for each email that contains a sales offer.

[Go to Top](#)

5. The Third Step: Creating a Site That Will Attract Tremendous Amounts of Traffic

Once you have chosen your keywords you are ready to build your site. For your domain name you should strive for an exact match domain (EMD) if available. So if your keyword is 'women car insurance' you'll go for www.womencarinsurance.com. If this is not available try the .net, .info or any other TLD that happens to be available.

EMD domains used to get you a big advantage with Google - but not anymore. Unfortunately Google has changed their algo regarding EMDs but it can still get you some extra points, and of course anything that Google gives we are willing to take.

As for the hosting service I highly recommend you use HostGator (If the link doesn't work, copy and paste the following URL into a browser: www.liraz.com/hostgator), They are reliable, responsible and very suitable for internet marketing activities.

The cheapest and fastest way to build an effective niche site is to use Wordpress. and by the way, HostGator is probably the easiest web hosting platform to install Wordpress on. Using a few clicks of the mouse, your HostGator-hosted Wordpress site will be up and ready in less than five minutes. look for instructions at their site.

Once Wordpress is installed on your server there are some modifications that you need to make to the site.

First you need to set Wordpress to present SEO Friendly Permalinks. Although we don't concentrate on the internal pages of our site, they often can rank in the SE's. So it is very important to set a good URL structure. Once logged into Wordpress, Click "Settings" then "Permalinks" and change it from default to "Post Name." This will change the structure of the URL's from default (site.com/?p=114 for example) to a good, SEO friendly version (site.com/title-of-post-goes-here).

Now replace the default theme with another one, simply find a new theme that is simple and "clean" - use the automated theme installation process from within Wordpress.

"Appearance" then "Themes" (while logged into Wordpress) then click the "Install Themes" tab. Leave all of the fields empty (they are by default) and then click the "Find Themes" button.

Next, Clean the theme from unnecessary elements - by default, most themes have the sidebar loaded up with useless things like META links, a calendar, archives etc. The footer also typically contains one or more links that can be removed and there are a few other useless things included by default as well. So the next step is to clean all of that up! We don't want excessive external links draining the authority we generate, which could be going back into our internal pages. And we want everything focused on the content and the ads.

Now you need to set the homepage to show only one article - it needs to look more like a static site and less like a blog. Primarily because it reduces canonical URL's and

duplicate content. To do this, you're going to publish the homepage article as a page rather than as a post!

Once you've done that, click "Settings" then "Reading" and select the "A static page" radio button and then next to "Front page" select the page that is optimize for your keyword and then click "Save Changes." Now view your site in a browser and you should see that article, and that article only, on the homepage.

Now Clean up the footer and the sidebar and remove any unneeded links like the link to the theme creator's website, the link to Wordpress, Etc.

What theme should you choose for your Wordpress site?

While there are many free Wordpress themes out there, I recommend you use a theme called [Thesis](http://www.liraz.com/thesis) (If the link doesn't work, copy and paste the following URL into a browser: <http://www.liraz.com/thesis>). This is much more than a theme, it's more of a design and template manager for Wordpress and it's the best theme for a business site that is meant to be ranked high on the search engines.

Now what about content?

You need to start with at list 6 article pages for a new site. Each article should be 500 to 1000 words long.

The best source for site content is a service called [Article Builder](http://www.liraz.com/articlebuilder) (If the link doesn't work, copy and paste the following URL into a browser: www.liraz.com/articlebuilder).

Article Builder produces high quality unique articles built around the topics and keywords that you give it. Each article is built by weaving together snippets to build an article based on your category and subtopic choices. They have tens of thousands of categorized snippets in the database, every time you generate an article, it's different!

If article builder does not have articles in your topic you'll have to contract someone to write the articles for you, this is not expensive. Simply run a Google search for "article writing" or "articles writers" and you'll get plenty of offers.

In addition to being a good source of content Article Builder has another extremely useful feature. It can post content automatically to your Wordpress site on the schedule you choose. Why this is important? because Google likes sites that are being updated with new material on a regular basis. It is recommended that you set Article Builder to post a new article to your site once a week or about 3 articles monthly, this way you'll gain some extra points with Google.

Now here is a trick to creating articles fast and cheap. This is not very ethical and I am a bit shame telling you I did it, but anyway since I pledged to tell you all my tricks (or at least most of them ;-), I fill obliged to tell you about this one too, just that you'll know that this is available.

Here's how it works, you run a Google search with your topic as the search term, you add the word 'tips' or 'Guide' to the search. Now you collect several snippets from

different good on topic articles that came in the search. next, you combine these snippets into one article. Now you spin this article with a spinner software to get an entirely new article. Just make sure you use the manual spinning mode so that your article will make sense.

In case you are not familiar with the concept of "spinning articles" here are some explanations. With this process you utilize a simple software program that takes an original article and alter it using replacement words (synonyms via an automated thesaurus) in order to create entirely new articles without having to re-write them. It's called "spinning" an article. This have many uses in the Internet Marketing field and we will talk about it later when we discuss linking strategies.

The best spinner software on the market today is called... [The Best spinner](#) (If the link doesn't work, copy and paste the following URL into a browser: **www.liraz.com/bestspinner**). If you wish to be a successful internet marketer you need to familiarize yourself with this concept. They have on their site a nice video explaining its uses. You should take a look.

Optimizing Your Site For the Search Engines

Once you have your pages and content in place it's time to optimize them so that your pages will rank as higher as possible on Google and the other search engines. In this section we'll deal with the "On Page" optimization.

While the "Off-Page" optimization, mainly the external linking structure (that we'll discuss later), is what will give you your unfair advantage - the on-page optimization is a pre-requisite for the off-page to succeed. What I mean to say is that if the on-page optimization is not done right, the best off-line optimization in the world will not help you one bit. so you need to pay attention here.

I'll walk you now step by step in what you need to do:

1. Title tag - this is an HTML tag that goes within the header section of the page. Title tags are the most important on-page factor for SEO. Your keyword should be included within the title tag preferably close to the beginning of it. This is what Google shows on its search results page so you should also make it attractive so that it will entice searchers to click on it. Don't just throw your keyword there, make sure that it is appealing.

2. Headline tags (H1, H2, H3) - make sure your page include one H1 tag with your keyword in it. This headline tag shows Google that the text within it is important to the intended audience.

3. Meta Description tag - while this does not have a bearing on the ranking of the page, Google still pulls the text of how it describes your page to other people from this tag - be sure to make it attractive so that more people will be clicking your page.

4. Images - you should include at list 2 images in each page. Also add one video to one of the pages in your site, you can simply embed a video from YouTube. Make sure one

of the images has your keyword in its ALT tag. All other images need to also have ALT tags but should not include your keyword in them. Too many ALT tags with your keyword can lead to an over optimization penalty by Google.

4. Keyword density - the exact keyword density is not important, I'll say it again, the exact percentage of the keyword density is not import. Simply include about 3 instances of your keyword in each page, one of them should be close to the beginning of the article, one of them can be in Bold or Italics and that will do (do not be tempted to overdo it - that's a common newbie mistake).

5. Synonyms - you can include 2 or 3 synonyms to your page that does not include exact words from your keyword.

6. Article Topic - this is important- your content should be on topic and match the niche and the keyword that is being targeted.

7. Outbound link - add one outbound link pointing to an authority site in your topic. This could be a Wikipedia page in a similar topic to yours. Place it at the bottom of the page, you can call it 'recommended source' or something similar. Ah, and do not add a 'no follow' tag to it, leave it in a natural state.

8. Unique Content - the page should be unique and not a duplicated one, if you are using a spun article it should be at least 75% unique. it should also be making sense and has decent grammar.

9. Length of articles - each page should be between 500 and 1000 words long. Be sure to vary the length of the articles in a site. Don't make all the articles exactly the same size.

Once your site is online and the on-page optimization is set, it's time to start creating links pointing to it. That's the subject of our next chapter.

[Go to Top](#)

6. The Fourth Step; Creating an External Linking Structure That Will Blast Your Site to the Top of Google

Search rankings for a specific keyword are primarily driven by the backlinks to your website using that keyword in the anchor text. But not all backlinks are treated equally. The more powerful a back link is, the more "juice" it flows into your website. And the more "link juice" that flows into your website, the higher your website ranks in search results. So both quantity and quality of back links are important in ranking higher in search results.

Getting external links, the link building phase of the Amazing Formula is the single most critical factor for attaining high rankings and consequently making money online.

Your link building activities are what will make or break your online business. On one hand, when done right, it can blast your pages to the top of Google - on the other hand, even a small mistake can drop your pages into the Google abyss.

Too many links containing the exact same anchor text - Boom, Busted!

Too many links from low quality sites - Boom, Busted!

Too many links coming from just one genre (e.g. only from directories) - Boom, Busted!

Too many links coming from non relevant pages - Boom, Busted!

You get the picture...

That is why I strongly encourage you to acquire every piece of link building knowledge you can lay your hands on. Sorry pal, there is no way around it. if you wish to succeed in internet marketing you must know link building. Even if you are planning to outsource your link building tasks, you should be able to supervise everything that is done for you, and you should ask that they get your approval in advance for all the details of each linking campaign they run for you.

Listen to what happened to me once...

One of my sites had a page that was ranked #6 on the first page of Google's search results for a very competitive term for a couple of years. This page was earning me a nice sum of money day in and day out. One day I decided to try to improve its ranking, I contracted a firm from the Philippines to do a small manual linking campaign for this page. This firm came highly appraised on the forums and the people there were nice and seem knowledgeable. At that time I was busy with a big project and also a bit out of laziness I neglected to ask for a preapproval. To make a long story short, one month and 400 Dollars later my page sank to the fourth page of the Google SERPs.

Now there are two morals to the story:

First, don't count on anyone to do a link building job for you without your approval, in advance, of any small detail of it.

Second, If you have a money producing page ranked anywhere on the first page of Google - don't mess with it!

If you are curious as to what went wrong with this campaign. In the postmortem I discovered that they created too many backlinks with the exact keyword as the link text - and this is something that Google does not like.

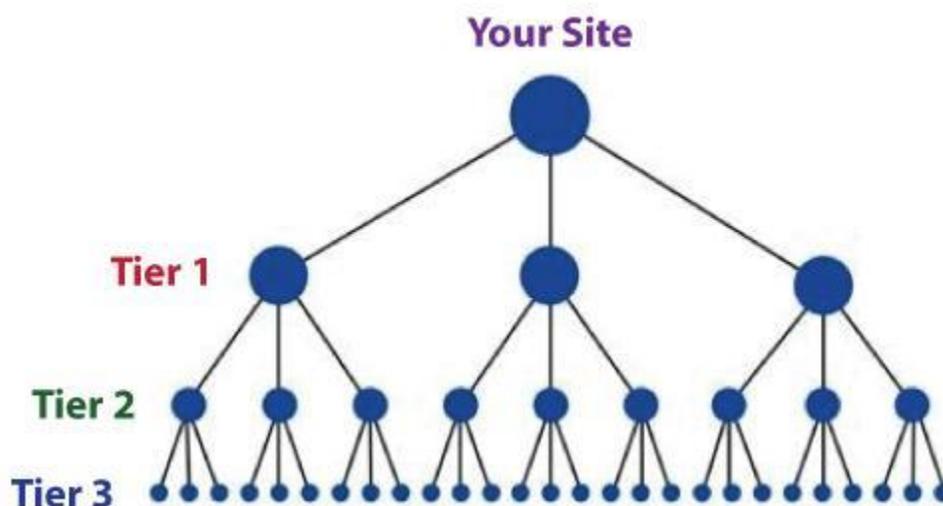

Now, the best link building knowledge source that I know of is the [Link Building Course](#) (If the link doesn't work, copy and paste the following URL into a browser: www.liraz.com/linkbuilding). I strongly encourage you to buy their course. It's a bit pricy but it is well worth the price. Look at it this way, each mistake that is not being avoided due to lack of knowledge can cost you many many times more than the price of this course.

OK, now we are ready to delve into the Amazing Formula's linking strategies.

For our external linking structure we are going to utilize the most effective most powerful linking strategy there is, called "Tiered Linking".

With Tiered Linking you build 3 tiers of links, the links in tier 1 points to your money page, tier 2 points to tier 1 and tier 3 points to tier 2. Basically you are building backlinks to your backlinks. This structure gives your first tier of backlinks more strength and authority. Over time your tier 1 backlinks will gain page rank and that link juice gets passed directly onto your site. It creates a knock on effect passing huge volumes of link juice and authority all the way down the chain to your site. Another advantage of this structure is that it gives search engine spiders thousands of paths and opportunities to land on your site which will further increase rankings.

Here's a diagram that gives you a representation of the Tiered Linking structure:

Now let's start with the process of building links for tier 1, these links point directly to your money site.

The links for tier 1 should be created manually and gradually. This means it should be done by you or outsourced to a firm that does manual linking - no automatic software at this phase. It should be spread gradually over two months, faster than that can trigger Google's penalty algos. You can't speed up stuff like building tier 1 links, or else you're going to get penalized.

If you don't have the time or the inclination to do the manual link building yourself, you can outsource it. This is what I'm doing. Manual link building is a tedious task so I usually hire someone else to do it for me. A good and reliable manual link building service that you can hire is [Rank Crew](#) (If the link doesn't work, copy and paste the following URL into a browser: **www.liraz.com/rankcrew**). I highly recommend them.

While building tier 1 you need to vary the anchor text as much as possible since Google discount too many instances of exact match anchor text. Follow these guidelines for the link text (anchor text) of your back links:

20% Main keyword exact match (e.g.: "main keyword")

20% Variation of main keyword (e.g.: "best main keyword resource")

50% Generic anchor text (e.g.: "click here, here, clicking here, good resource, see this, have a look")

10% URL of the page as the link text (e.g.: "www.mainkeyword.com" or "mainkeyword.com" or "http://www.mainkeyword.com")

Now to the actual link building. I can't teach you here all the aspects of doing basic linking, this is beyond the scope of this guide. You should be able to find plenty of resources for that online, or better off, buy the [Link Building Course](#) (If the link doesn't work, copy and paste the following URL into a browser: **www.liraz.com/linkbuilding**), this is the best resource of linking knowledge that I know of.

I will however give you some basic guidelines, point you to the right directions and provide you with a list of sites that can feature links pointing to your site.

Important Note: before you create backlinks with any site, make sure they are not adding the NoFollow tag to their links - do not create tier 1 links with sites that NoFollow their links.

Now here's a list of site's categories where you should build links for your tier 1 (find more sites in the Appendix):

Web 2.0's - great for creating mini sites with articles and videos that link back to your main site. You can use spun articles for the content. Here's where [The Best spinner](#) (If the link doesn't work, copy and paste the following URL into a browser: **www.liraz.com/bestspinner**) will come handy. You can use articles that are spun to 50%. Create 10 blogs here and post to them with your link embedded. Make sure the topics are relevant to your keywords, this is important.

Here's a sample of sites in this category (find more in the appendix):

wordpress.com
blogger.com
issuu.com
yola.com
tumblr.com
weebly.com
my.opera.com
livejournal.com
typepad.com
sfgate.com

Social Bookmarking - get your site bookmarked! 30 bookmarks will do it.

Here's a sample of sites in this category (find more in the appendix):

connotea.org
delicious.com
digg.com
reddit.com
slashdot.org
stumbleupon.com
citeulike.org
chime.in
bibsonomy.org
blinklist.com

Directories - web directories are a great source for links - strive for about 40 quality directory links submissions. Seems tedious? there is an excellent tool that can help you with this task. It will make creating manual links from directories a breath. I strongly recommend that you use it: [DeepLinkerPro](#) (If the link doesn't work, copy and paste the following URL into a browser: **www.liraz.com/deeplinker**) It allows you to use varied anchor text and also to drip feed the submissions over time to make it all look as natural as possible.

Here's a sample of sites in this category (find more in the appendix):

wordpress.org/showcase
abc-directory.com
cssdrive.com
cuedirectory.com
dirbull.com
dirnext.com
Elecdir.com
elsf.org
envirolink.org
freerwebdirectory.com

Blog Directories - If you have a blog get it listed on these sites.

Here's a sample of sites in this category (find more in the appendix):

technorati.com
alltop.com
blogs.com
globeofblogs.com
blogcatalog.com
topix.net/dir
blogtopsites.com
blogtoplist.com
ontoplist.com
hotvsnot.com

Quality Article Directories - You can use spun articles for submission to these directories. Note that the better directories will review your articles before accepting to their site, so make sure they are grammatically correct and make sense. Submit to 30 directories here.

Here's a sample of sites in this category (find more in the appendix):

TheFreeLibrary.com
Ezinearticles.com
GoArticles.com
SelfGrowth.com
Gather.com
ArticlesBase.com
ArticleDashboard.com
ArticleSnatch.com
ArticleCity.com
Isnare.com

Video - create some videos and submit to video sites. You can find at fiverr.com folks that will create a nice video for you for 5 bucks a piece. 3 or 4 video submissions will do for this category.

Here's a sample of sites in this category (find more in the appendix):

youtube.com
vimeo.com
dailymotion.com
metacafe.com
truveo.com
videoegg.com
videobomb.com
veoh.com
liveleak.com
ifilm.com

RSS Directories - Create a RSS feed and submit to these sites. Submit to 30 directories here.

Here's a sample of sites in this category (find more in the appendix):

topix.net
blogdigger.com
feedage.com
feedcat.net
finance-investing.com
jordomedia.com
medworm.com
redtram.com
rssmountain.com
swoogle.umbc.edu

Doc Sharing - Submit a PDF file or a PowerPoint presentation here.

Here's a sample of sites in this category (find more in the appendix):

issuu.com
slideshare.net
scribd.com
docstoc.com
thinkfree.com
keepandshare.com
memoware.com
yudu.com
ziddu.com
docs.zoho.com

Press Releases - a good source for backlinks and news coverage - most of them cost money though.

Here's a sample of sites in this category (find more in the appendix):

businesswire.com
prlog.org
betanews.com
i-newswire.com
pitchengine.com
pr-inside.com
prlog.org
businessportal24.com
cgidir.com
free-press-release.com
information-online.com

Blog Guest Posting - guest blogging is a powerful link building strategy, however, it's a time-consuming pain in the butt! This can boost your rankings but it is not mandatory to the Amazing Formula.

Link Favors - ask friends, Acquaintances and family to place links pointing from their sites to yours.

Creating links for tier 2 and tier 3

Once you have all your tier 1 links set it is time to start building your tier 2 and tier 3 links.

While with tier 1 we were careful to create our links manually in order for them to appear as "naturally" as possible, with tiers 2 and 3 we can let the quality slip a bit and increase the overall quantity of links that we build.

We still want our links to be contextual and relevant, but we can now use auto generated content on a second tier without a problem. We can worry a lot less about the overall authority and page rank of the domains we are building links from as we start to move the focus away from quality and towards quantity.

For tiers 2 and 3 we are going to leave the "manual" path and move to the "automatic" path. We are going to use a tool that will generate all our tiers 2 and 3 automatically. The best tool for this task is [Senuke](#) (If the link doesn't work, copy and paste the following URL into a browser: www.liraz.com/senuke). This is the tool that most successful Internet marketers use.

Senuke is a very powerful backlinking tool which has been designed to assist with the time consuming task of creating a large number of links. I'm not going to describe here how Senuke works as they have videos on their site that describe it better than me. What I can tell you is that with Senuke you can create tiered link structures. As much as Senuke is powerful it is very easy to operate, creating tiered links is as easy as moving images on a screen - you need to see it to believe, just go to their site and watch the video. Now, what you do with Senuke is create a 2 tiered structure. It looks like a pyramid - one tier points to another tier that points to one of your tier 1 links - you need to build a different structure for each of your tier 1 links. Use their schedule feature to spread it over time.

Some say that it is safe to also use Senuke for creating the tier 1 links. They may be right, however being the cautious guy that I am, I am not yet ready to test this Hypothesis. I would stick with using only manual methods for the tier 1 links and I strongly advise you to do the same..

In addition to Senuke The Amazing Formula calls for the use of yet another powerful tool called [Backlink Booster](#) (If the link doesn't work, copy and paste the following URL into a browser: www.liraz.com/backlinkbooster). Backlink Booster automatically increases the power of the backlinks to your website. It's both a backlink indexer aiming to get your backlinks indexed faster, and also a backlink booster to help boost the amount of link juice each of your backlinks sends to your website (use it on your tier 1 backlinks).

Now, if we have Senuke why would we also need Backlink Booster? The fact is that many of the backlinks you are building are never found by Google thus seriously diminishing your linking efforts. What Backlink Booster does is it builds backlinks to your backlinks in a way that all of those backlinks that Google didn't find, are now found by Google. This not just help Google discover all of your backlinks, it also "boost" them so

that now more link juice gets passed to your site thus the authority they all possess is multiplied, which flows through to your website! So the end result is more, stronger backlinks!

My tests show that operating Backlink Booster in addition to Senuke creates a strong synergetic effect that translates in a much better Google rankings. It's the one-two punch that will get you that elusive Unfair Advantage. Anyway, in order to rip the full power of the Amazing Formula you need to activate both Senuke and Backlink Booster.

This concludes The blueprint of my simple strategy for making money online. Once you completed to create tire 2 and 3 links with Senuke and have Backlink Booster do its thing, all you have to do is sit back and watch your site climb the search engines rankings and the money that is pouring into your bank account.

Here's To Your Success

Meir Liraz

Appendix 2: Sources for Backlinks Sorted by Category and Page Rank

This list include the following categories:

- * Web 2.0's
- * Bookmarks
- * Directories
- * Blog Directories
- * Quality Article Directories
- * Video
- * RSS
- * Doc Sharing
- * Press Releases

Important Note: before you create backlinks with any of the sites on the following list make sure they are not adding the NoFollow tag to their links - do not create tier 1 links with sites that NoFollow their links.
