## 1. The Single Most Critical Factor in Making Money Online

You may be wondering who am I and what qualify me to give you Article marketing advice. Well, my name is Meir Liraz. You may have stumbled on my name on the internet, probably in relation to my activities as a writer and publisher of business guides. This is just one side of me, the visible one. There has been another side to my online presence, a concealed one, as a leading player in the internet marketing arena.

I've been an active internet marketer since the first days of the Internet, back then the reigning search engines where dinosaurs bearing names like Alta-Vista, Infoseek and Lycos, while Google was just a vague idea in the minds of two brilliant Stanford University students.

As I don't believe in theories and opinions, I've tested dozens of Internet marketing ideas, strategies and variables. Some proved to be successful while others bombed (and served me well as learning experiences). I must've been doing something right as I managed to accumulate along the way a seven figure fortune. The bottom line is that I've come up with a simple strategy that has enabled me to make money online like crazy.

As a bonus, I've included within this book a special section where I describe exactly the simple strategy that made me an Internet Millionaire. This is a step by step guide that will allow you to mimic my method and make a killing online.

Why reveal my methods now? Well, I'm semi retired now and I've made enough money so that my kids do not have to work one more day in their lives (if they so desire). I've had my blessings and now I want to help others succeed as well, this is my way to give back.

Now look, 99% of the folks who try to make it on the Internet follow the same rout, the same set of activities. They all move in one big herd. Listen, In the highly competitive online arena, when you do the same things as anyone else you don't stand a chance to succeed - you are doomed.

In order to win the Internet marketing battles you must go off the beaten path, you need to do something different, you need a competitive edge - and that is where the simple strategy presented in the bonus section come into play. It will give you that "unfair advantage" to boost your sales, pile up profits and leave your competitors in the dust.

When a soldier goes into battle he seeks to equip himself with the best weapons he could lay his hands on. The same goes for the internet marketing battles. The single most important factor in utilizing this strategy successfully is equipping yourself with the right tools and services. The magic word is 'Automation'. You need to have the best tools and you need to know how to put them to best use. This is critical, some of the tools that I'll show you can actually hurt you if not used correctly.

Look, in order to make money on the internet you need to get noticed by Google and you need to climb up the search engines' results pages (SERPs). Unfortunately Google gives preference to large and established sites. The little guy with a relatively new or

small website does not stand a chance. You could of course go the "natural" rout. That will take you about 5 years to establish a site that will be liked by Google. I don't know about you, but I prefer to start making money with a new site much earlier than that. That is why you need to use some special tools, to take some unconventional measures - you need to be a little more creative. Sound complicated? don't worry, in the special bonus section, I'll give you exact instructions as of how to do it right.

Here's a list of the tools and services that I use while executing my strategy, later on I'll show you exactly how the strategy works and how these tools integrates perfectly within it to come up with the easiest, fastest, most effective way of making money online:

- 1. Keyword Research Tool:** [Keyword Canine](http://www.liraz.com/canine) - a multi-featured tool for niche discovery, keyword research and backlink analysis (for more details see here: <http://www.liraz.com/canine>)
- 2. Hosting Service:** [HostGator](http://www.liraz.com/hostgator) - a reliable web hosting. Has some extra features that makes it suitable for internet marketing activities. (for more details see here: <http://www.liraz.com/hostgator>)
- 3. Wordpress Theme:** [Thesis](http://www.liraz.com/thesis) - much more than a theme, it's more of a design and template manager for Wordpress. Most suitable for a business site that is meant to be ranked high on the search engines. (for more details see here: <http://www.liraz.com/thesis>)
- 4. Content Creator:** [Article Builder](http://www.liraz.com/articlebuilder) - produces high quality unique articles built around the topics and keywords that you give it. (for more details see here: <http://www.liraz.com/articlebuilder>)
- 5. Email Marketing Tool:** [Weber](http://www.liraz.com/aweber) - automatically manage all email marketing activities: creates sign-up forms, collects and manages subscribers, sends out scheduled emails and more. Powerful yet very easy to use. (for more details see here: <http://www.liraz.com/aweber>)
- 6. Article Spinner:** [The Best spinner](http://www.liraz.com/bestspinner) - a multi-featured tool for creating multiple versions of an article that will be seen as unique in the search engines. (for more details see here: <http://www.liraz.com/bestspinner>)
- 7. Links Building knowledge:** [Link Building Course](http://www.liraz.com/linkbuilding) - a comprehensive link building learning framework that is constantly updated to reflect the most recent effective link building strategies (for more details see here: <http://www.liraz.com/linkbuilding>)
- 8. Manual Link Building:** [Rank Crew](http://www.liraz.com/rankcrew) - an affordable and reliable manual link building service (for more details see here: <http://www.liraz.com/rankcrew>).
- 9. Automatic Directory Submission:** [DeepLinkerPro](http://www.liraz.com/deeplinker) - automate the creation of manual directory links, allows the use of varied anchor text and also to drip feed the submissions over time to make it all look as natural as possible (for more details see here: <http://www.liraz.com/deeplinker>)

**10. Automatic Link Builder:** [Senuke](http://www.liraz.com/senuke) - a powerful backlinking tool which has been designed to assist with the time consuming task of creating a large number of links (for more details see here: <http://www.liraz.com/senuke>)

**11. Backlinks Indexer and Booster:** [Backlink Booster](http://www.liraz.com/backlinkbooster) - automatically increases the power of the backlinks to a website. It's both a backlink indexer aiming to get the backlinks indexed faster, and also a backlink booster to help boost the amount of link juice each of the backlinks sends to a website (for more details see here: <http://www.liraz.com/backlinkbooster>)

Now, the next chapter features great tips and ideas proven to kick-start your Article marketing. Starting in chapter 3 I reveal the simple strategy that made me an internet millionaire.

[Go to Top](#)

## **2. 101 Great Tips and Ideas Proven to Kick-Start Your Article Marketing**

1. Keep your content up to date. If readers come across an older article and realize it is dated, they will leave immediately. You should try to keep your articles recent, which can simply be done by adding links to updated articles. Take advantage of the "Most Recent" or "Most Popular" features on your site. This way, even old content will generate money for you.
2. Identify your audience and tailor your content and ads to this market niche. Also, you don't need to be scared of changing your ads up every once in a while by using various graphics or text. Trial and error is the best way for you to find out what works regarding technique.
3. Find a blogger from the destination that you are researching. You will be sure to get honest information from a blogger that lives in that particular town. Make contact with that person, to get personal recommendations about the wonderful places you should see or which restaurants you should eat at.
4. Make your articles relevant to a large number of people. Specialized subjects may be interesting to some, but most people won't read past the first sentence if it isn't something that they are interested in or passionate about. Think in terms of generalization when it comes to how you write your articles.
5. Make an Ebook. This is a portfolio of sorts, a collection of all the articles you have written. You do not want it to be too small, so wait until you have amassed a large number of articles. You can use this to show off your writing skills or sell it to people looking for article collections.
6. Participate in as many forums as you have time for. If you do not think that you have the time to do it, make the time. You will get a great deal of input about what people are interested in, and it will help you find the information to include in the articles that you are marketing.
7. Publishing is the goal of an article marketer. Sites, blogs and other directories to host your content and link back to your site are essential. Remember each site has their own set of terms and conditions, so be sure to read and follow them carefully.
8. Always try to stay as relevant as possible in your article marketing campaign by creating a set of email alerts for any breaking news. If you can be among the first to get out in front of a breaking product or trend, your readership will stay tuned in and appreciate your site as a source of legitimate and useful information.
9. Try to write articles that have the ability to help people resolve their problems. If readers find that your articles pertain to the issues in their lives and offer sound advice for solutions, they are likely to become loyal followers.
10. Titles are as important as the actual content when it comes to article marketing. If an article's title is bad, no one will bother to read the full post. Make sure it's reader friendly

and represents your article appropriately. Give your reader an idea of what the article is all about.

11. Sometimes when a person is looking for a creative or new way for them to market through an article using an article that is not blatantly marketing something can be the best way. By producing an article that does not directly shove a product in someones face but subtly suggests it one can have more success.

12. The beauty of article marketing is that these original articles, if published in the correct places, can bring a continual flow of traffic to your website. The best thing about the customers, which are brought to your site with these articles, is that they already have a pretty good idea about what you have to offer, and they are hungry to learn more.

13. Make sure that your article is created with search engines in mind. This means that you need to include keywords in the title, first sentence and throughout the body of the piece. You also want to have keywords in the final paragraph and in any descriptions of the article that you have.

14. If you have sent out email newsletters to your customer base before, these newsletters can assist your article marketing efforts. Use newsletters as the basis for new articles to post on your website or submit to directories. Try to rewrite your material rather than using it unchanged; you want to avoid the possibility of a potential customer running into duplicate content.

15. Always have someone you know check your articles before you use them for marketing. Most of the time you put so much time into the keywords in your articles that you tend to neglect simple things and use the wrong words in wrong contexts.

16. Write for people, not search engines. Many marketers get so caught up in keyword optimization that they forget that their articles are going to be read by people. Rather than stuffing your article full of keywords at the expense of readability, focus on making the article interesting and easy to read. Don't forget that ultimately, your business needs to cater to human beings.

17. Don't try to connect your keywords to strange topics in hopes of luring in a tangent demographic. For example, health insurance is not similar to a trip to Las Vegas, and you will probably not have very happy health insurance or trip to Las Vegas seekers if you write an article that misdirects both groups and forces them to read the resultant awkward text! Use keywords that fit conceptually with the product or service you are selling.

18. Using freebies on your article helps your site. Freebies give customers a sense of value and increase the chances that they will be repeat buyers. When you have branded freebies, you'll find that your marketing message spreads quickly. Keep this in mind.

19. Select a category that will be profitable, but make sure you know something about the area. It may be that book reviews make more money than any other site, but if you

never read, then it's not the area for you. Choose topics that are both money makers and fit with your strengths.

20. Make paragraphs short, so they are easier to read. Some people say, with justification, that it is harder to concentrate on reading material on a computer screen than it is on the printed page. Keeping your article short and to the point will keep your readers happy.

21. It is important to be patient when employing article marketing tactics. Article marketing is definitely not the quickest sort of online advertising. The benefits take months to make an impact on website traffic figures. One distinct advantage to focus on is that article marketing is a fairly long-term strategy; its traffic-boosting effects linger for a long time after the initial effort is made.

22. Make your articles your own. Have a little of your personality written into the article and be original because it allows people to connect with you better. Let your personality shine through. Your targeted readers will be much more likely to visit again.

23. Use social media to your advantage. Both Twitter and Facebook are excellent ways to boost your readership. Posting updates when you publish fresh content could grab a few readers' attention. They could then share your post with their friends and even more people would see what you have posted.

24. A good way to increase your visibility and market your articles, is by writing guest posts on other blogs. Approach bloggers who write about a subject that is relevant to your articles and ask if you can write a guest post. Be sure to include a link back to your website at the end of the post.

25. By adding pictures that are relevant to the article one can provide an eye catching addition to the article to increase its marketing potential. However one needs to be sure that the picture does not make up the content but simply supplement the existing article content so the information is still there.

26. A lot of article marketers attempt to be really fancy in their prose. They're writing a lot more like a poet than someone trying to drive traffic, and the end result is a slim readership that cannot quite relay what the writer is trying to convey. Be very direct in your style when you're trying to get people to your site or to someone else's product.

27. You can always send your articles out on a test run to see if there are any loose ends you need to tie up. As an article marketer, some articles are going to do well while others sit around collecting dust. Find people to read and judge your articles before you decide to release them. This will help you avoid those dust-collectors.

28. Before marketing an article, it is a good idea to look at what articles in the same niche have already been published. Since they know what else is out there, they can make their article a more effective marketing tool.

29. Are you at a loss for interesting article topics? Look to the news for interesting stories that you can tie to your niche. You can have an email alert set up at most sites

which will notify you of new stories related to your niche. Using daily news in your article writing is a great way to keep your articles topical and current.

30. Use a free online keyword density tool in order to determine what the total keyword percentage is within each article. The search engines frown on keyword stuffing, and may ignore your article if too many keywords are used. If too few are used, your articles may meet the same fate.

31. Write about the same topic from different angles to produce more value-added content. Regardless of your topic, have a cheatsheet with several different angles to write. The best beeswax, beeswax benefits, beeswax flavors, beeswax history, and so on. Here are a few more: Top 10 beeswax producers, 5 ways to cook with beeswax and using beeswax for weight loss.

32. The title should grab an Internet user's attention and make them want to read the rest of your article. There are millions of articles online, so it takes some work to stand out.

33. Don't be boring if you want to succeed at article marketing. Readers have a million different choices in what to lay their eyes on. If you are rambling on and on about nothing or presenting dry information that could put a active toddler to sleep then you aren't going to keep readers interested.

34. Pay attention to what is working and what is not. Sometimes certain market ideas will not resonate with readers. Try to tailor new projects to those that have been successful in the past. Recognizing potential gold mines will maximize profits. It is often better to stick with what has already proven to be profitable instead of always trying to reinvent the wheel.

35. Use specific, concrete words in your title. Your article's title should concisely describe what the reader can expect to learn from the article. An example of a bad title might be "Working at home," while a much better title for the same article might be "How to Make Money in Your Spare Time Writing Article Marketing Tips on Amazon Mechanical Turk."

36. Construct articles that are filled with facts. You establish yourself as knowledgeable and gain the confidence of potential customers by creating informative articles. Articles add to your website by providing it with unique and original content. When you have creative and unique articles on your website, your chances improve on ranking higher on search engine results.

37. Mix your article with different technical information. If your niche is technical, include some facts. Also include an easier-to-understand explanation for people who do not comprehend complicated terminology. You should try to address and appease all of your readers so that they will all respect you as a writer and look for your writing in the future.

38. Schedule your article postings on your calendar, and stick to them. Consistently updating can be one of the most difficult tasks to manage when you write articles.

Writing them on your schedule, like you would a work schedule, can give you the reminders and motivation you need to succeed at providing new articles on a regular basis.

39. Be a seamless streamer. Every article should have a call to action at the end of it, but many times they are far too obvious. Your article should flow directly into the call to action without your readers ever realizing it is happening. Practice doing this until it becomes natural for you.

40. By adding pictures that are relevant to the article one can provide an eye catching addition the article to increase its marketing potential. However one needs to be sure that the picture does not make up the content but simply supplement the existing article content so the information is still there.

41. When you're starting out your article marketing campaign, take it slowly at first. Don't try churning out dozens of articles your first week. A good goal at first is to write one 400-word article every week. Once you can do this easily, gradually increase your productivity until you can turn out an article a day.

42. Your articles should have something to do with your keywords. There has to be cohesiveness between your title, key phrases, images, etc. The search engines require some sort of connection so they can judge the relevancy of your blog.

43. Success in article marketing is relative to the product you're attempting to push. Your ultimate goal should be the continued success of any particular campaign you're working on, not anything quantified using dollar signs. Remember that the money will come as your presence starts to expand, so work first to target your audience.

44. If you find that your articles are a very good quality, you should consider creating an ebook and giving them away to your readers. You can do a giveaway, which will get more traffic. Who doesn't like to win something? While they are trying to win the ebook, they will see what else you have to offer, and it could lead to a sale.

45. If one is exceptionally skilled at article marketing then they may want to consider offering their skills to other companies who are interested for a fee in return. Producing articles for others will not only provide some income but also allow one to practice writing to improve even more upon their abilities.

46. Ezines are one of the best publishing platforms to use for an article marketing campaign. Remember to check the requirements ezines put on their articles, though. These requirements can change frequently. Review an ezine's terms of service before you send it your first article, and go back to check it for changes regularly if you continue sending it material.

47. Article marketing is only successful if the content is fresh. You cannot let your content get stale on a website. It needs to be updated and added to constantly. Old content might attract new traffic to your site but it will lose repeat traffic. Attention spans are small these days and only new information will keep your audience engaged.

48. To get the most out of your article marketing efforts, keep up with search engine trends, especially if you can find a multi-annual history. Some keyword phrases spike in usage cyclically, such as holidays. Anticipate this on your calendar and have fresh content ready every year. Write for what's relevant to holidays this year.

49. When a prospective client is aware that your product has worked for others, the authenticity of the product in their mind edges them towards purchasing it. Include a section which features real life testimonials from people who have used your product and were satisfied with the results.

50. Try to highlight a problem and offer a solution in each article you write. If you describe in detail a problem that readers are having then offer them solution, you could dramatically increase the number of leads an article generates. A useful article will also lead to more of your visitors linking to the article.

51. Long articles can be the bane of a reader's existence, so remember not to stretch the topic out any longer than you have to. If it's something really important or really complicated you're trying to convey, then length is okay as long as it's interesting. But eliminate the fluff in order to keep things ASAP 'As Short As Possible'.

52. For success in article marketing, a streamlined approach to writing is best. Make your pieces relatively short. People do not have time to read pages of content. So, be brief but stay on-point. Concentrate on the exact information you want to convey and don't get distracted. You will build a reputation for sharp, clear work that readers will appreciate.

53. When you produce an article to promote one of your affiliate products, make the product's best benefit the opening of your article. Kicking your article off with a bang is the best way to hook readers quickly and hustle them along the path to becoming customers. For a product with multiple benefits, see if previous customers will tell you which one they consider most impressive.

54. Spinning your articles makes for cheap content creation which will help boost your Google Page Rank. Ensure that any spun article has at least 50% uniqueness, and be sure not to over-spin any one article. Google isn't happy about spun content, but if you make it very unique, you shouldn't have any problems.

55. If you don't have time to write good articles yourself, outsource your article writing. This is easy and inexpensive, and it gives you a way to ensure well-written and unique content. You can utilize many different companies or freelance sites that put unlimited numbers of quality writers, right at your fingertips.

56. Before every article you submit, you need to check your spelling and grammar. Read the article out loud so that you can hear how it sounds, and catch any simple mistakes you might have made. The more mistakes your article has, the more people will assume you don't really know what you are doing.

57. Post your articles on the most popular article marketing sites for maximum exposure. Ezinaarticles, Hubpages, Squidoo and Examiner.com are popular sites that

have good reputations for quality content. This attracts more readers to your content, and ultimately to your site. Make sure you add a call to action in each article, and make good use of the author's resource box with links to your site.

58. Make a promise in your article's title and answer it with the content. People read articles to find solutions. Offer them "5 tips for..." or the "best ways to.." and then add real, useful information in the article body. Look for unique, fun or unconventional tips that do not appear in every other article on the topic.

59. Avoid offering your affiliate customers discounts. This is a tempting strategy many people go to in an effort to drive more sales. Problem is, people buy things because they need them, and because the item is top quality. Continually remind yourself that people buy based on value -- then build value into every part of your business.

60. To be successful at article marketing it's important to set goals. Commit to sending out a certain number of articles each day. This will motivate you to prioritize your day. Setting goals will give you focus and help you to be successful at what you do.

61. Utilize the "advanced search" option on your search engine to get the best results for your search. This is especially efficient when doing academic research for a paper. In the "search within a site or domain" option, write ".gov", or ".edu." This action only pulls results from sites with these endings. This ensures that the search results come from academic or legal sources, which is crucial to writing a paper or official journal.

62. Keep your articles simple. If you bury the useful information under a bunch of junk or technical jargon readers are going to move on to someone else. Worse, if you get a reputation for this you won't attract readers and people will avoid anything with your name on it in favor of others.

63. Follow a simple and consistent format. For every article you write, separate your paragraphs, use bullet points, and make sure your editing is correct. Readers lose patience with writers when they lump everything into a difficult to follow mass. Pull important points out so people can see them to entice your audience to keep reading.

64. Work on your word count. A good article should not be too long to be entertaining, or too short to be informative. Different article directories want different sized articles as well. Most look for articles between three hundred to eight hundred words, so if you consistently stick with five hundred, you should be fine.

65. Double check your links. As soon as your article gets published, visit it. Click every link inside to make sure they are all accurate and working correctly. You do not want to send your readers to a 404 screen, or some random website that has nothing to do with you or your article.

66. If you are having trouble organizing your articles and getting them read, employ the tried-and-true list format. Articles arranged as lists have proven to be extremely popular and effective on the internet. The structure is an easy one for writers to work with. Readers respond well to list-type articles. Lists keep article paragraphs short and punchy - ideal for online writing.

67. Turn your adverts into articles. By writing stories, guides, tutorials or news articles related to your product or service, Internet users will read your advert without even knowing that it is an advert. If you write your articles well, once readers have finished reading your article, they are likely to be very interested in your product or service.

68. As an article marketer, you might find that you need to invest a little money, but what you really need to invest is your time. So if you do not have enough free time on your hands to devote to making sure your work is great, then you probably shouldn't get started on marketing in the first place.

69. Using curses or curse words in ones articles should usually be avoided for the majority of article marketing that one is going to be doing. However using a small amount of curse words in articles that are going to be marketed towards an adult audience can help capture the reader's attention.

70. The content you write forms the core of your article marketing effort. Your articles have considerable value. If you run across your articles posted without your consent and without links to your website, rectify the situation. Try to use a reasonable approach with content thieves. If you convince them to use a properly-attributed and linked version of your article instead, you can turn your loss into a benefit.

71. Article marketing has many tricks that one will not learn right away when beginning to get into the field. However by talking to someone who has already been article marketing for much longer than you one can learn some helpful information that they would have not learned at all possibly.

72. Write articles and reviews of the products that you are using. You have to seem knowledgeable and happy with a product for your viewers to want to try it out. Providing detailed reviews or information regarding the product will help your audience understand the product and want to click through.

73. Check and recheck your article for errors. You do not want to have errors of any kind in your article, whether they are due to spelling, grammar, or formatting. If you allow these errors to slip through when you submit, you will lose a lot of credibility with your readers, who will go elsewhere for accuracy.

74. Be a poster child for frequency. Post new articles as often as you can. This is the fastest and easiest way to develop new readers, and get search engines and article databases to focus on you. The more you update with new information, the more your articles will appear, enticing new readers.

75. In order to become a better writer, read as much as you can. When you read the work of others, you'll learn new techniques and ways to play with words. Reading constantly will help with your writing skills. It is not important what you read, just continue to read anything available.

76. Do not, under any circumstances, plagiarize. Not only will your article be rejected, but you could actually get in trouble with the law. It is perfectly fine to use other

resources (such as the internet) when writing an article. Just do not take the information and copy it word for word.

77. A little research goes a long way when it comes to giving an accurate description of a product or service in your article. If you do not know a lot about what you're writing about, make sure that you do your research and check out other users' reviews and double-check that information to ensure that it's as accurate as possible.

78. Use numbers and/or bullets in your article. This will make the main points easier for your audience to read and digest. It will also help to make your article visually interesting. Readers are more likely to pay close attention and stay with your article until the end.

79. Consider using an online tool that gives out your articles to different websites automatically. The more people that see your article, the more potential business you will generate when those readers click on the links in your blog. This will also make you look popular to the search engines.

80. Establish yourself as an expert. Use the knowledge and expertise you possess. Don't rely on the knowledge of others. You are where you are because of what you know. Others are sure to find value in the expertise you possess. In addition, you stand out from others when your expertise shines loud and clear through your articles.

81. When promoting your online articles, a great tip is to always use social media to promote your articles. Post links on Facebook, Twitter, Myspace and other such sites, to get your name out there. Because of the vast amount of people who use these particular sites, social media is a great medium to use.

82. If you're accepting guest content in order to keep your site fresh and relevant, always make sure you read over the content thoroughly before posting it. Pay attention to the quality of the content, where someone's links lead to, and if this content has been posted anywhere before, because once you accept the content, it is your responsibility.

83. Use a pull to drag people in. Readers want to have their curiosity satisfied. If you ask a question or make them wonder in the title of your website, readers will be attracted to finding out what the answer is. Use this to your advantage by dragging readers into your site, and hopefully they will stick around for your interesting content.

84. When writing to get traffic, do not worry about the length of your content or the exact topic it covers. You need to target a few keywords that people would use if they were interested in reading something similar to your content. Your content needs to refer constantly to these keywords.

85. Find out what topics people search for the most. These are the topics that will likely gain you the most readers, so try to find a commonly searched subject that also fits your niche. Make sure that you include the keywords in the title, so that your article will show up when someone does search.

86. So, you've written and posted your article on the directories. What should you do next? Try tweeting about your article a few times per day. Pick several small excerpts to tweet and make sure that they clearly address your chosen topic. This can pique the interest of your followers, and begin to build a flow of traffic to your article.

87. Consider paying for article distribution services if you want additional article circulation. These services will promote your work for you by submitting your content to all the popular directories. Calculate whether this increased exposure will pay off for you. It may well be worth the cost.

88. Keep track of every single article that you submit to a directory. By looking at statistics, you can learn a lot of information about who is reading your articles, where they are coming from, how long they are staying and a lot more. Then, you can create more articles based on the topics that do well.

89. Showing how other customers have benefited from your product will make your new visitors trust you and more likely to buy from you. Include testimonials from satisfied customers on your website. This can be what turns a website visitor into one of your paying customers.

90. Use an article resource box. This is a framed box at the end of each of your articles. It gives the reader a bit of background information on the article's author, where to find more articles by the same writer, any projects you may be working on, and sometimes includes a picture.

91. Be sure your articles read like articles and not ad copy. If your articles read like a sales pitch, article directories will reject them. You should not mention your product or brand multiple times. Some article directories require that you only mention a brand or product once. Sometimes it's best just to mention it in the resource box and not in the article.

92. Many websites that accept articles will pay the author based on clicks or page views. This means that you can get a constant stream of income going after a while. If you are consistent, article marketing can be a full-time job.

93. Sometimes one may be rushed to meet a deadline for an article they are going to produce. Unfortunately this can lead to sloppy mistakes or an otherwise poor quality article. Staying organized and having a good idea of the time one will need is an aspect that is important to article marketing.

94. When you write a product review article, decide on the product's very best feature and open your article with it. Include it in the article title if you can. The earlier you can hook your reader, the better. The reader will be more interested and curious and more receptive to learning about the product that you are reviewing.

95. Always make your content unique. Don't base your writing off articles written by others or copy articles and only change a few words. Articles that are 100 percent original stand out, both to readers and to search engines. If you are writing on a topic that is well-covered, add a twist or a new way of looking at it to keep it unique.

96. Your articles should be concise and conversational in tone so that the widest possible audience can understand them with ease. If your article is written at a high reading level, then people won't read it through to the end. You should be careful to use easy words and shorter paragraphs to make your article more user-friendly.

97. Good article marketers know how to strike a balance between article quality and speed of article release. Readers, website visitors, and customers all have short memories. It is vital to give them a regular stream of fresh content to maintain their interest and keep them aware of the products and services being marketed.

98. Stay on topic. Your article should always be relevant to whatever it is promoting. If you are writing about home improvement, there is no reason to throw in a story about your recent vacation to the Bahamas. Readers want the content to match the topic, so make sure you don't stray too far.

99. Avoid submitting articles with the same or similar titles. There is no way your article can seem unique, if it has the same title as another article. You must give each article a unique title and you must have five to twenty versions of the title for posting the article in different venues. Remember that you must always have your keyword included in your title.

100. Success in article marketing revolves around the content that you are publishing. Publish writings about any topic that is going to fit your preference, need or a solution to the issues that many readers may have. How-to articles are going quite well on many sites, so give them a go.

101. Bringing in a writer from an outside source to do one article, a series of articles, or even as a permanent addition to the team can enhance the capabilities of one's article marketing. Not only will it be a fresh source of ideas but it can lighten the load bringing many benefits.

## **Special Bonus: The Simple Strategy That Made Me an Internet Millionaire**

### **3. The First Step: Discovering Profit-Driving Keywords**

There is a special breed of Online-Millionaires that are making money on the internet like crazy. You've probably never heard of them. They keep themselves and their activities under the radar. Why? because they follow a certain simple strategy and they don't want you or anyone else to discover it. This strategy has created more millionaires than you could ever think possible.

How do I know? I am one of those Millionaires, and I'm going to reveal to you now each and every component of this incredible strategy.

My name is Meir Liraz. You may have stumbled on my name on the internet, probably in relation to my capacity as a writer and publisher of business guides. This is just one side of me, the visible one. There has been another side to my online presence, a concealed one. And there is where I've been taking advantage of that simple strategy to accumulate my seven figure fortune.

So why reveal my methods now? Well, I'm semi retired and I've made enough money so that my kids do not need to work one more day in their lives (if they so desire). I've had my blessings and now I want to help others succeed as well, this is my way to give back.

Now look, 99% of the folks who try to make it on the Internet follow the same rout, the same set of activities. They all move in one big herd. Listen, In the highly competitive online arena, when you do the same things as anyone else you don't stand a chance to succeed - you are doomed.

In order to win the internet battles you must go off the beaten path, you need to do something different, you need a competitive edge - and that is where my simple strategy comes into play. It gives you that "unfair advantage" to boost your sales, pile up profits and leave your competitors in the dust.

When a soldier goes into battle he seeks to equip himself with the best weapons he could lay his hands on. The same goes for the internet battles. The single most important factor in utilizing my strategy successfully is equipping yourself with the right tools and services. The magic word is 'Automation'. You need to have the best tools and you need to know how to put them to best use. This is critical, some of the tools that I'll show you can actually hurt you if not used correctly.

Look, in order to make money on the internet you need to get noticed by the search engines and you need to climb up the search engines result pages (SERPs). Unfortunately Google and the other search engines give preference to large and established sites. The little guy with a relatively new or small website does not stand a chance. You could of course go the "natural" rout. That will take you about 5 years to establish a site that will be liked by Google. I don't know about you, but I prefer to start

making money with a new site much earlier than that. That is why you need to use some special tools, to take some unconventional measures - you need to be a little more creative.

As a matter of fact, one of the best kept secrets of the cyber-millionaires is what tools they use and, more importantly, how they make use of them for maximum benefit.

Now I'm going to show you exactly how this simple strategy works and how the tools integrate perfectly within it to come up with the easiest, fastest, most effective way of making money online.

The way my strategy works is simple. You focus on creating quick little sites that each target a laser targeted long-tail keywords. Once you complete one site you quickly move onto the next. So you don't want to spend too much time on any one site. This way you create, one by one, an army of passive income websites that keep producing cash for years.

I'll show you exactly how to create and promote your first money making website, than you just rinse and repeat to create as many websites as you wish, the more sites you create the more money you make. The only limit is how far you want to go.

Now let's not waste any more time and move directly to the first component of the strategy which deals with deciding on the keywords your site is going to target. This is a crucial decision and a fundamental part of achieving success online. You could do everything else perfectly, but target the wrong keywords and your site will be a total failure. in this chapter I'll tell you exactly what to look for when searching for good solid keywords.

Most Internet Marketing "experts" and the self-proclaimed gurus will tell you to use the Google Keyword Tool (now called: "Keyword Planner" and is only available to Adwords account users) for your keyword research. This is a big mistake! if you only use the Google tool you'll end up going in circles with the rest of the herd achieving no success. Why? although the Google tool will provide you with a nice list of several hundred keyword variations, it will tell you nothing as to the competitiveness of the terms. You have no clue as to how hard it will be to rank in the search engines for any specific term. This is critical. Most newbies will choose a term from the Google Tool that is too competitive and end up hitting a brick wall. You certainly don't want to be spending any time or money building a site that will never rank in the SE's.

In order to implement the strategy successfully you need to utilize for your keyword research a tool named [Keyword Canine](http://www.liraz.com/canine) (If the link doesn't work, copy and paste the following URL into a browser: **www.liraz.com/canine**).

Keyword Canine (KC) will also provide you with a nice list of several hundred keyword variations but it goes beyond the Google Tool in that it will also analyze the competitiveness of each keyword variation. This is crucial and that is where you gain your "unfair advantage" over the 99% that only use the Google Tool.

How does KC do it? it has a special algorithm in its backend that looks at the top 10 Google search results for your chosen keyword and produces an accurate analysis in the form of "Very Easy, Easy, Moderate, Hard or Fierce" so you can literally plug in your keyword and get an instant answer.

Keyword Canine has a ton of additional features that can help you as an Internet marketer but for the purpose the implementation of my strategy, the competition analysis is what we need.

I'm not going to walk you here thru the steps of conducting a keyword research with Keyword Canine as they have pretty good tutorials explaining everything. Simply sign for the service and follow their instructions.

Now let's see what properties a keyword must have in order to make us the most money.

For starter it has to be of a commercial value. This relates to our business model, the way we monetize our site. I will elaborate on this in a later chapter but for now I can tell you that our income will come from two sources:

- a. Google AdSense ads.
- b. Affiliate Programs

To maximize our income from those two we need to look for keywords in markets that has AdSense advertisers and affiliate programs that are willing to pay us top dollars. in the appendix you can find a list of the 50 best paying affiliate marketing niches. These are the markets that has a high concentration of AdSense advertisers and affiliate programs that are willing to pay top Dollars for your referrals. If you plan to tap any of these niches you must take into consideration that these are also the most competitive ones. However, I think it is still possible to find gem keywords in these areas provided you do your keyword research right. Alternatively you can look at other, less competitive, niches and still make good money as long as you take into consideration their commercial value.

Another property that you want to consider when looking for good keywords is the search volume. Obviously, even a #1 ranking isn't going to do you any good at all if nobody searches for the keyword that you rank for. I would say that the minimum search volume you should look for is 500 monthly searches (Keyword Canine shows you the search volume right next to the keywords in the list). Some will say that this is too low to target, however I had many successes with pages targeting close to this number of monthly searches.

The next property you need to consider for a good keyword is how competitive it is, how hard it will be to have it ranked in the first page of Google's search results. This is critical, however if you use Keyword Canine it will do the competition analysis for you and come with a recommendation in the form of "Very Easy, Easy, Moderate, Hard or Fierce". I would not go beyond "easy" with a new site.

So to summarize, in order to find a good keyword you need to consider:

- \* Commercial value
- \* Search volume
- \* competition strength

How many keywords should you target in one site? Some will tell you that you need to look for several terms and optimize each page in the site for a different term. This is not how my strategy works. For the small niche sites that we create it is best to dedicate each site to only one keyword and direct all our Search Engine Optimization (SEO) efforts towards the main page that is optimized for that keyword. We don't want to dilute our efforts by targeting several keywords in a site. With this concept in mind we don't want to waste our time looking for other keywords that will not rank anyway. Your time is better spent working on your linking structure (discussed later) or researching new keywords for new sites.

[Go to Top](#)

## 4. The Second Step: Monetizing Your Site

The Simple Strategy's business model is based on 2 sources of income:

- a. Google AdSense ads.
- b. Affiliate Programs

Which is better? there is no clear answer to this question. Some niches will produce better with affiliate programs while others with AdSense, you should test on a niche by niche bases. Usually you'll make more money with an affiliate site, unfortunately there may be many instances where you will find a good niche with keywords that can be easily ranked but no suitable affiliate program, in this case you'll use AdSense ads, and by the way, this will happen to you a lot.

Once you find a good keyword to target you start looking for an affiliate program that will go with this site. As a rule of thumb you should always prefer to promote digital products (eBooks, software, online services, etc.) over physical products. Why? because digital products come with higher margins which in most cases translate into higher commissions to the site owner.

Where can you find good affiliate programs to promote?

Your first bet should be the [Clickbank Marketplace](https://accounts.clickbank.com/marketplace.htm) (<https://accounts.clickbank.com/marketplace.htm>)

Clickbank offers thousands of products, look for products that are 100% relevant to your niche and has a credible sales page.

If you can't find a suitable product at Clickbank try one of the following affiliate program directories:

[Commission Junction](http://www.cj.com) (<http://www.cj.com>)

[Affiliatetips.com](http://www.affiliatetips.com) (<http://www.affiliatetips.com>)

[AssociatePrograms.com](http://www.associateprograms.com/directory/) (<http://www.associateprograms.com/directory/>)

[Affiliatesdirectory.com](http://affiliatesdirectory.com/directory) (<http://affiliatesdirectory.com/directory>)

If you still can't find a suitable affiliate program try a Google search that combines your keyword with the word "affiliates" and other similar variations. Sometimes this works and you will find one or more good affiliate offers for your niche.

If all of the above does not work and you can't find an affiliate program that is relevant to your target niche, monetize your site with AdSense ads. This is not necessarily a bad thing. I had AdSense ads that produced \$5, \$6 and even \$9 per click.

Anyway, don't ever be tempted to post affiliate links that are not fully relevant to your target keywords! this will never produce satisfactory results.

Where should you place your affiliate links and AdSense ads on the page? The best spot would be right below the top article title and above the article body, if you are using Wordpress it would be directly below the post title and above the post content. This would be the spot that will by far produce the best results.

As for the AdSense ads, I always match the background and border of the ad with the background of the theme where the ad will be placed and I recommend you do the same - my tests show that this increases the effectiveness of the ads. You can use a plug-in for Firefox and Chrome called [Colorzilla](http://www.colorzilla.com/) (http://www.colorzilla.com/) to help you do this quickly.

Another good option for the affiliate links is to embed them within the text, preferably towards the top part of the article.

As for affiliate links, my tests show that reviews and text ads will, in most cases, outperform banners. I guess some folks simply ignore banners altogether. I seldom use banners to promote affiliate offers, I've always found effective ways to present affiliate offers with text only. I will be the first to admit that my pages are not very pretty, but hey, I'm not in the business of creating cute pages, I am in the business of making money, and for this my "not pretty" pages are doing very well.

Below is an example of affiliate links embedded within an article:

The screenshot shows a webpage with a blue header bar containing the text "Free Car Insurance Deals". Below the header, the main content area has a title "Here's How to Get Free Car Insurance Deals" in red. The text below the title discusses finding the best car insurance rates and recommends two services: [InsurMe](#) and [Kanetix](#). The [InsurMe](#) link is followed by the text "May save you hundreds on your car insurance. Simply enter in your zip code and get free quotes from providers in your local area that offer great rates." The [Kanetix](#) link is followed by the text "Provides multiple company insurance rates, see how companies compete for your business. Offers great rates from quality insurers." At the bottom of the snippet, there is a partially visible line of text: "Once you have in your hands several quotes, you can use The [Car Insurance Price](#)".

Here's is an example of affiliate links in a review format placed under the title of an article. By the way, I've used this format, "The 5 Best ...", multiple times with various niches. Over the years this format proved to be very profitable for me.

## Car Insurance Information Center

### 7 Day Car Insurance, Compare to Get Low Cost Rate

#### The 5 Best Car Insurance Quotes Providers

We've reviewed dozens of auto insurance companies, brokers and agents to bring you this elite list of brands with the best free quotes online and very cheap rates. We recommend you get a quote from each company so that you will be able to compare and get the best rate. This comparison will allow you to save as much as \$500 and more on your vehicle insurance.

- |   |   |
|---|---|
| 1 | <a href="#">Car Insurance Finders</a> - May save you hundreds on your car insurance. Simply enter in your zip code and get free quotes from providers in your local area that offer the best rates. |
| 2 | <a href="#">USInsurance</a> - Simply fill out the quick form and this system will match you up with the cheapest offers in real-time. You get low cost custom tailored quotes within minutes.       |
| 3 | <a href="#">InsureMe</a> - Provides multiple company insurance rates, see how companies compete for your business. Offers great rates from quality insurers.  |
| 4 | <a href="#">2Insure4Less</a> - Provides comparison quotes which can be purchased immediately, offers great rates.   |
| 5 | <a href="#">Kanetix</a> - Offers one of the easiest to use, and most 'consumer-friendly' instant insurance comparison service available.  |

For many people, it is not easy to get a large amount to cover something such as insurance coverage. It could be a significant wide range of dollars to cover at one time, therefore, the choice of no deposit car insurance is often rather appealing.

No deposit car insurance implies that you get instant auto insurance protection straight away, when the insurance policy is put over your car, so you do not need to pay anything in advance. You are able to pay the insurance policy on a monthly base in payments; nevertheless, you may have to offer a credit card for guarantee that you submit several

### Build an Email List

The biggest sin committed by internet marketers is not building an email list made of emails collected from visitors and customers. In order to maximize the profit potential of your site you need to create an email list. Fortunately, all the aspects of building and maintaining a list can be, and should be, automated. Selling to your list is the easiest money you're going to make.

Now I'm not going to teach you basic Email marketing here, you'll find plenty of resources online. However, here are 4 important points that you should consider:

1. Build an opt-in form and integrate it into your home page. Place it "above the fold," so visitors can see it immediately and don't have to scroll down.
2. Offer a lead magnet, something that has value that you offer in exchange for the visitor's email address. This could be a free eBook, a special report, a webinar, a list of tips, Etc. You have to tailor the offer to fit your niche so that you keep your list targeted, this is important.

3. Use [Weber](#) (If the link doesn't work, copy and paste the following URL into a browser: **www.liraz.com/aweber**) to manage your list building and marketing activities. Aweber is the industry standard. It's extremely powerful yet very easy to use, most of the successful internet marketers use it. Working with Aweber is a breath, it will automate all your email marketing activities: creating your sign-up forms, collecting and managing subscribers, sending out scheduled emails and more.

4. Email marketing is about creating a relation with your visitors and customers, it's about trust. Do not abuse it by spamming your list with frequent blatant sales offers. Send them at list 3 useful, content filled, emails for each email that contains a sales offer.

[Go to Top](#)

## 5. The Third Step: Creating a Site That Will Attract Tremendous Amounts of Traffic

Once you have chosen your keywords you are ready to build your site. For your domain name you should strive for an exact match domain (EMD) if available. So if your keyword is 'women car insurance' you'll go for [www.womencarinsurance.com](http://www.womencarinsurance.com). if this is not available try the .net, .info or any other TLD that happens to be available.

EMD domains used to get you a big advantage with Google - but not anymore. Unfortunately Google has changed their algo regarding EMDs but it can still get you some extra points, and of course anything that Google gives we are willing to take.

As for the hosting service I highly recommend you use [HostGator](http://HostGator) (If the link doesn't work, copy and paste the following URL into a browser: [www.liraz.com/hostgator](http://www.liraz.com/hostgator)), They are reliable, responsible and very suitable for internet marketing activities.

The cheapest and fastest way to build an effective niche site is to use Wordpress. and by the way, HostGator is probably the easiest web hosting platform to install Wordpress on. Using a few clicks of the mouse, your HostGator-hosted Wordpress site will be up and ready in less than five minutes. look for instructions at their site.

Once Wordpress is installed on your server there are some modifications that you need to make to the site.

First you need to set Wordpress to present SEO Friendly Permalinks. Although we don't concentrate on the internal pages of our site, they often can rank in the SE's. So it is very important to set a good URL structure. Once logged into Wordpress, Click "Settings" then "Permalinks" and change it from default to "Post Name." This will change the structure of the URL's from default (site.com/?p=114 for example) to a good, SEO friendly version (site.com/title-of-post-goes-here).

Now replace the default theme with another one, simply find a new theme that is simple and "clean" - use the automated theme installation process from within Wordpress.

"Appearance" then "Themes" (while logged into Wordpress) then click the "Install Themes" tab. Leave all of the fields empty (they are by default) and then click the "Find Themes" button.

Next, Clean the theme from unnecessary elements - by default, most themes have the sidebar loaded up with useless things like META links, a calendar, archives etc. The footer also typically contains one or more links that can be removed and there are a few other useless things included by default as well. So the next step is to clean all of that up! We don't want excessive external links draining the authority we generate, which could be going back into our internal pages. And we want everything focused on the content and the ads.

Now you need to set the homepage to show only one article - it needs to look more like a static site and less like a blog. Primarily because it reduces canonical URL's and

duplicate content. To do this, you're going to publish the homepage article as a page rather than as a post!

Once you've done that, click "Settings" then "Reading" and select the "A static page" radio button and then next to "Front page" select the page that is optimize for your keyword and then click "Save Changes." Now view your site in a browser and you should see that article, and that article only, on the homepage.

Now Clean up the footer and the sidebar and remove any unneeded links like the link to the theme creator's website, the link to Wordpress, Etc.

What theme should you choose for your Wordpress site?

While there are many free Wordpress themes out there, I recommend you use a theme called [Thesis](http://www.liraz.com/thesis) (If the link doesn't work, copy and paste the following URL into a browser: <http://www.liraz.com/thesis>). This is much more than a theme, it's more of a design and template manager for Wordpress and it's the best theme for a business site that is meant to be ranked high on the search engines.

### **Now what about content?**

You need to start with at list 6 article pages for a new site. Each article should be 500 to 1000 words long.

The best source for site content is a service called [Article Builder](http://www.liraz.com/articlebuilder) (If the link doesn't work, copy and paste the following URL into a browser: [www.liraz.com/articlebuilder](http://www.liraz.com/articlebuilder)).

Article Builder produces high quality unique articles built around the topics and keywords that you give it. Each article is built by weaving together snippets to build an article based on your category and subtopic choices. They have tens of thousands of categorized snippets in the database, every time you generate an article, it's different!

If article builder does not have articles in your topic you'll have to contract someone to write the articles for you, this is not expensive. Simply run a Google search for "article writing" or "articles writers" and you'll get plenty of offers.

In addition to being a good source of content Article Builder has another extremely useful feature. It can post content automatically to your Wordpress site on the schedule you choose. Why this is important? because Google likes sites that are being updated with new material on a regular basis. It is recommended that you set Article Builder to post a new article to your site once a week or about 3 articles monthly, this way you'll gain some extra points with Google.

Now here is a trick to creating articles fast and cheap. This is not very ethical and I am a bit shame telling you I did it, but anyway since I pledged to tell you all my tricks (or at least most of them ;-), I fill obliged to tell you about this one too, just that you'll know that this is available.

Here's how it works, you run a Google search with your topic as the search term, you add the word 'tips' or 'Guide' to the search. Now you collect several snippets from

different good on topic articles that came in the search. next, you combine these snippets into one article. Now you spin this article with a spinner software to get an entirely new article. Just make sure you use the manual spinning mode so that your article will make sense.

In case you are not familiar with the concept of "spinning articles" here are some explanations. With this process you utilize a simple software program that takes an original article and alter it using replacement words (synonyms via an automated thesaurus) in order to create entirely new articles without having to re-write them. It's called "spinning" an article. This have many uses in the Internet Marketing field and we will talk about it later when we discuss linking strategies.

The best spinner software on the market today is called... [The Best spinner](#) (If the link doesn't work, copy and paste the following URL into a browser: **www.liraz.com/bestspinner**). If you wish to be a successful internet marketer you need to familiarize yourself with this concept. They have on their site a nice video explaining its uses. You should take a look.

## **Optimizing Your Site For the Search Engines**

Once you have your pages and content in place it's time to optimize them so that your pages will rank as higher as possible on Google and the other search engines. In this section we'll deal with the "On Page" optimization.

While the "Off-Page" optimization, mainly the external linking structure (that we'll discuss later), is what will give you your unfair advantage - the on-page optimization is a pre-requisite for the off-page to succeed. What I mean to say is that if the on-page optimization is not done right, the best off-line optimization in the world will not help you one bit. so you need to pay attention here.

I'll walk you now step by step in what you need to do:

- 1. Title tag** - this is an HTML tag that goes within the header section of the page. Title tags are the most important on-page factor for SEO. Your keyword should be included within the title tag preferably close to the beginning of it. This is what Google shows on its search results page so you should also make it attractive so that it will entice searchers to click on it. Don't just throw your keyword there, make sure that it is appealing.
- 2. Headline tags (H1, H2, H3)** - make sure your page include one H1 tag with your keyword in it. This headline tag shows Google that the text within it is important to the intended audience.
- 3. Meta Description tag** - while this does not have a bearing on the ranking of the page, Google still pulls the text of how it describes your page to other people from this tag - be sure to make it attractive so that more people will be clicking your page.
- 4. Images** - you should include at list 2 images in each page. Also add one video to one of the pages in your site, you can simply embed a video from YouTube. Make sure one

of the images has your keyword in its ALT tag. All other images need to also have ALT tags but should not include your keyword in them. Too many ALT tags with your keyword can lead to an over optimization penalty by Google.

**4. Keyword density** - the exact keyword density is not important, I'll say it again, the exact percentage of the keyword density is not import. Simply include about 3 instances of your keyword in each page, one of them should be close to the beginning of the article, one of them can be in Bold or Italics and that will do (do not be tempted to overdo it - that's a common newbie mistake).

**5. Synonyms** - you can include 2 or 3 synonyms to your page that does not include exact words from your keyword.

**6. Article Topic** - this is important- your content should be on topic and match the niche and the keyword that is being targeted.

**7. Outbound link** - add one outbound link pointing to an authority site in your topic. This could be a Wikipedia page in a similar topic to yours. Place it at the bottom of the page, you can call it 'recommended source' or something similar. Ah, and do not add a 'no follow' tag to it, leave it in a natural state.

**8. Unique Content** - the page should be unique and not a duplicated one, if you are using a spun article it should be at least 75% unique. it should also be making sense and has decent grammar.

**9. Length of articles** - each page should be between 500 and 1000 words long. Be sure to vary the length of the articles in a site. Don't make all the articles exactly the same size.

Once your site is online and the on-page optimization is set, it's time to start creating links pointing to it. That's the subject of our next chapter.

[Go to Top](#)

## **6. The Fourth Step; Creating an External Linking Structure That Will Blast Your Site to the Top of Google**

Search rankings for a specific keyword are primarily driven by the backlinks to your website using that keyword in the anchor text. But not all backlinks are treated equally. The more powerful a back link is, the more "juice" it flows into your website. And the more "link juice" that flows into your website, the higher your website ranks in search results. So both quantity and quality of back links are important in ranking higher in search results.

Getting external links, the link building phase of the Amazing Formula is the single most critical factor for attaining high rankings and consequently making money online.

Your link building activities are what will make or break your online business. On one hand, when done right, it can blast your pages to the top of Google - on the other hand, even a small mistake can drop your pages into the Google abyss.

Too many links containing the exact same anchor text - Boom, Busted!

Too many links from low quality sites - Boom, Busted!

Too many links coming from just one genre (e.g. only from directories) - Boom, Busted!

Too many links coming from non relevant pages - Boom, Busted!

You get the picture...

That is why I strongly encourage you to acquire every piece of link building knowledge you can lay your hands on. Sorry pal, there is no way around it. if you wish to succeed in internet marketing you must know link building. Even if you are planning to outsource your link building tasks, you should be able to supervise everything that is done for you, and you should ask that they get your approval in advance for all the details of each linking campaign they run for you.

Listen to what happened to me once...

One of my sites had a page that was ranked #6 on the first page of Google's search results for a very competitive term for a couple of years. This page was earning me a nice sum of money day in and day out. One day I decided to try to improve its ranking, I contracted a firm from the Philippines to do a small manual linking campaign for this page. This firm came highly appraised on the forums and the people there were nice and seem knowledgeable. At that time I was busy with a big project and also a bit out of laziness I neglected to ask for a preapproval. To make a long story short, one month and 400 Dollars later my page sank to the fourth page of the Google SERPs.

Now there are two morals to the story:

First, don't count on anyone to do a link building job for you without your approval, in advance, of any small detail of it.

Second, If you have a money producing page ranked anywhere on the first page of Google - don't mess with it!

If you are curious as to what went wrong with this campaign. In the postmortem I discovered that they created too many backlinks with the exact keyword as the link text - and this is something that Google does not like.

Now, the best link building knowledge source that I know of is the [Link Building Course](#) (If the link doesn't work, copy and paste the following URL into a browser: [www.liraz.com/linkbuilding](http://www.liraz.com/linkbuilding)). I strongly encourage you to buy their course. It's a bit pricy but it is well worth the price. Look at it this way, each mistake that is not being avoided due to lack of knowledge can cost you many many times more than the price of this course.

OK, now we are ready to delve into the Amazing Formula's linking strategies.

For our external linking structure we are going to utilize the most effective most powerful linking strategy there is, called "Tiered Linking".

With Tiered Linking you build 3 tiers of links, the links in tier 1 points to your money page, tier 2 points to tier 1 and tier 3 points to tier 2. Basically you are building backlinks to your backlinks. This structure gives your first tier of backlinks more strength and authority. Over time your tier 1 backlinks will gain page rank and that link juice gets passed directly onto your site. It creates a knock on effect passing huge volumes of link juice and authority all the way down the chain to your site. Another advantage of this structure is that it gives search engine spiders thousands of paths and opportunities to land on your site which will further increase rankings.

Here's a diagram that gives you a representation of the Tiered Linking structure:

Now let's start with the process of building links for tier 1, these links point directly to your money site.

The links for tier 1 should be created manually and gradually. This means it should be done by you or outsourced to a firm that does manual linking - no automatic software at this phase. It should be spread gradually over two months, faster than that can trigger Google's penalty algos. You can't speed up stuff like building tier 1 links, or else you're going to get penalized.

If you don't have the time or the inclination to do the manual link building yourself, you can outsource it. This is what I'm doing. Manual link building is a tedious task so I usually hire someone else to do it for me. A good and reliable manual link building service that you can hire is [Rank Crew](#) (If the link doesn't work, copy and paste the following URL into a browser: **www.liraz.com/rankcrew**). I highly recommend them.

While building tier 1 you need to vary the anchor text as much as possible since Google discount too many instances of exact match anchor text. Follow these guidelines for the link text (anchor text) of your back links:

20% Main keyword exact match (e.g.: "main keyword")

20% Variation of main keyword (e.g.: "best main keyword resource")

50% Generic anchor text (e.g.: "click here, here, clicking here, good resource, see this, have a look")

10% URL of the page as the link text (e.g.: "www.mainkeyword.com" or "mainkeyword.com" or "http://www.mainkeyword.com")

Now to the actual link building. I can't teach you here all the aspects of doing basic linking, this is beyond the scope of this guide. You should be able to find plenty of resources for that online, or better off, buy the [Link Building Course](#) (If the link doesn't work, copy and paste the following URL into a browser: **www.liraz.com/linkbuilding**), this is the best resource of linking knowledge that I know of.

I will however give you some basic guidelines, point you to the right directions and provide you with a list of sites that can feature links pointing to your site.

**Important Note:** before you create backlinks with any site, make sure they are not adding the NoFollow tag to their links - do not create tier 1 links with sites that NoFollow their links.

Now here's a list of site's categories where you should build links for your tier 1 (find more sites in the Appendix):

**Web 2.0's** - great for creating mini sites with articles and videos that link back to your main site. You can use spun articles for the content. Here's where [The Best spinner](#) (If the link doesn't work, copy and paste the following URL into a browser: **www.liraz.com/bestspinner**) will come handy. You can use articles that are spun to 50%. Create 10 blogs here and post to them with your link embedded. Make sure the topics are relevant to your keywords, this is important.

Here's a sample of sites in this category (find more in the appendix):

wordpress.com  
blogger.com  
issuu.com  
yola.com  
tumblr.com  
weebly.com  
my.opera.com  
livejournal.com  
typepad.com  
sfgate.com

**Social Bookmarking** - get your site bookmarked! 30 bookmarks will do it.

Here's a sample of sites in this category (find more in the appendix):

connotea.org  
delicious.com  
digg.com  
reddit.com  
slashdot.org  
stumbleupon.com  
citeulike.org  
chime.in  
bibsonomy.org  
blinklist.com

**Directories** - web directories are a great source for links - strive for about 40 quality directory links submissions. Seems tedious? there is an excellent tool that can help you with this task. It will make creating manual links from directories a breath. I strongly recommend that you use it: [DeepLinkerPro](#) (If the link doesn't work, copy and paste the following URL into a browser: **www.liraz.com/deeplinker**) It allows you to use varied anchor text and also to drip feed the submissions over time to make it all look as natural as possible.

Here's a sample of sites in this category (find more in the appendix):

wordpress.org/showcase  
abc-directory.com  
cssdrive.com  
cuedirectory.com  
dirbull.com  
dirnext.com  
Elecdir.com  
elsf.org  
envirolink.org  
freerwebdirectory.com

**Blog Directories** - If you have a blog get it listed on these sites.

Here's a sample of sites in this category (find more in the appendix):

technorati.com  
alltop.com  
blogs.com  
globeofblogs.com  
blogcatalog.com  
topix.net/dir  
blogtopsites.com  
blogtoplist.com  
ontoplist.com  
hotvsnot.com

**Quality Article Directories** - You can use spun articles for submission to these directories. Note that the better directories will review your articles before accepting to their site, so make sure they are grammatically correct and make sense. Submit to 30 directories here.

Here's a sample of sites in this category (find more in the appendix):

TheFreeLibrary.com  
Ezinearticles.com  
GoArticles.com  
SelfGrowth.com  
Gather.com  
ArticlesBase.com  
ArticleDashboard.com  
ArticleSnatch.com  
ArticleCity.com  
Isnare.com

**Video** - create some videos and submit to video sites. You can find at fiverr.com folks that will create a nice video for you for 5 bucks a piece. 3 or 4 video submissions will do for this category.

Here's a sample of sites in this category (find more in the appendix):

youtube.com  
vimeo.com  
dailymotion.com  
metacafe.com  
truveo.com  
videoegg.com  
videobomb.com  
veoh.com  
liveleak.com  
ifilm.com

**RSS Directories** - Create a RSS feed and submit to these sites. Submit to 30 directories here.

Here's a sample of sites in this category (find more in the appendix):

topix.net  
blogdigger.com  
feedage.com  
feedcat.net  
finance-investing.com  
jordomedia.com  
medworm.com  
redtram.com  
rsmountain.com  
swoogle.umbc.edu

**Doc Sharing** - Submit a PDF file or a PowerPoint presentation here.

Here's a sample of sites in this category (find more in the appendix):

issuu.com  
slideshare.net  
scribd.com  
docstoc.com  
thinkfree.com  
keepandshare.com  
memoware.com  
yudu.com  
ziddu.com  
docs.zoho.com

**Press Releases** - a good source for backlinks and news coverage - most of them cost money though.

Here's a sample of sites in this category (find more in the appendix):

businesswire.com  
prlog.org  
betanews.com  
i-newswire.com  
pitchengine.com  
pr-inside.com  
prlog.org  
businessportal24.com  
cgidir.com  
free-press-release.com  
information-online.com

**Blog Guest Posting** - guest blogging is a powerful link building strategy, however, it's a time-consuming pain in the butt! This can boost your rankings but it is not mandatory to the Amazing Formula.

**Link Favors** - ask friends, Acquaintances and family to place links pointing from their sites to yours.

## Creating links for tier 2 and tier 3

Once you have all your tier 1 links set it is time to start building your tier 2 and tier 3 links.

While with tier 1 we were careful to create our links manually in order for them to appear as "naturally" as possible, with tiers 2 and 3 we can let the quality slip a bit and increase the overall quantity of links that we build.

We still want our links to be contextual and relevant, but we can now use auto generated content on a second tier without a problem. We can worry a lot less about the overall authority and page rank of the domains we are building links from as we start to move the focus away from quality and towards quantity.

For tiers 2 and 3 we are going to leave the "manual" path and move to the "automatic" path. We are going to use a tool that will generate all our tiers 2 and 3 automatically. The best tool for this task is [Senuke](#) (If the link doesn't work, copy and paste the following URL into a browser: [www.liraz.com/senuke](http://www.liraz.com/senuke)). This is the tool that most successful Internet marketers use.

Senuke is a very powerful backlinking tool which has been designed to assist with the time consuming task of creating a large number of links. I'm not going to describe here how Senuke works as they have videos on their site that describe it better than me. What I can tell you is that with Senuke you can create tiered link structures. As much as Senuke is powerful it is very easy to operate, creating tiered links is as easy as moving images on a screen - you need to see it to believe, just go to their site and watch the video. Now, what you do with Senuke is create a 2 tiered structure. It looks like a pyramid - one tier points to another tier that points to one of your tier 1 links - you need to build a different structure for each of your tier 1 links. Use their schedule feature to spread it over time.

Some say that it is safe to also use Senuke for creating the tier 1 links. They may be right, however being the cautious guy that I am, I am not yet ready to test this Hypothesis. I would stick with using only manual methods for the tier 1 links and I strongly advise you to do the same..

In addition to Senuke The Amazing Formula calls for the use of yet another powerful tool called [Backlink Booster](#) (If the link doesn't work, copy and paste the following URL into a browser: [www.liraz.com/backlinkbooster](http://www.liraz.com/backlinkbooster)). Backlink Booster automatically increases the power of the backlinks to your website. It's both a backlink indexer aiming to get your backlinks indexed faster, and also a backlink booster to help boost the amount of link juice each of your backlinks sends to your website (use it on your tier 1 backlinks).

Now, if we have Senuke why would we also need Backlink Booster? The fact is that many of the backlinks you are building are never found by Google thus seriously diminishing your linking efforts. What Backlink Booster does is it builds backlinks to your backlinks in a way that all of those backlinks that Google didn't find, are now found by Google. This not just help Google discover all of your backlinks, it also "boost" them so

that now more link juice gets passed to your site thus the authority they all possess is multiplied, which flows through to your website! So the end result is more, stronger backlinks!

My tests show that operating Backlink Booster in addition to Senuke creates a strong synergetic effect that translates in a much better Google rankings. It's the one-two punch that will get you that elusive Unfair Advantage. Anyway, in order to rip the full power of the Amazing Formula you need to activate both Senuke and Backlink Booster.

This concludes The blueprint of my simple strategy for making money online. Once you completed to create tire 2 and 3 links with Senuke and have Backlink Booster do its thing, all you have to do is sit back and watch your site climb the search engines rankings and the money that is pouring into your bank account.

Here's To Your Success

Meir Liraz

## **Appendix 1: The 50 Best Paying Affiliate Marketing Markets**

The following are the best paying affiliate marketing markets:

- Acne
- Aging
- Allergies
- Anxiety
- Arthritis
- Asthma
- Auto Insurance
- Back Pain
- Beauty
- Cancer
- Cats
- Cosmetic Surgery
- Credit Cards
- Credit Repair
- Debt Consolidation
- Depression
- Diabetes
- Dogs
- Email Marketing
- Employment
- Fitness
- Forex
- Hair Care
- Hair Loss
- Health Insurance
- Home Improvement
- Home Mortgages
- Home Owner's Insurance
- Home Security
- Homeschooling
- Insomnia
- Internet Marketing
- Life Insurance
- Muscle Building
- Network Marketing
- Nutrition
- Online casinos
- Online Poker
- Parenting
- Payday Loans
- Personal Bankruptcy
- Personal Development
- Personal Finance

Pregnancy  
Quit Smoking  
Real Estate  
Skin Care  
Snoring  
Stock Market  
Stress  
Teeth Whitening  
Travel  
Web Hosting  
Weddings  
Weight Loss

[Go to Top](#)

## Appendix 2: Sources for Backlinks Sorted by Category and Page Rank

This list include the following categories:

- \* Web 2.0's
- \* Bookmarks
- \* Directories
- \* Blog Directories
- \* Quality Article Directories
- \* Video
- \* RSS
- \* Doc Sharing
- \* Press Releases

**Important Note:** before you create backlinks with any of the sites on the following list make sure they are not adding the NoFollow tag to their links - do not create tier 1 links with sites that NoFollow their links.
